DINING ANNOUNCES NUMEROUS TARIFF CHANGES

Old Landmarks In Lillooet Destroyed In Outbreak of Fire

Hotel, Grocery Store, Movie Theatre and Government Liquor Store Also Ruined; Citizens Join in Battle to Save Downtown Section, but Fire Too Far Advanced.

Lillooet, B.C., May 1.—Fire which started in the power room of the Excelsior Hotel here last night swept through the downtown district of Lillooet this morning, destroying several buildings.

The losses are estimated at from \$50,000 to \$60,000. The Excelsior Hotel was burned to the ground, and among the places destroyed were the Santina House, Hurley's grocery, a moving picture theatre and the government liquor store.

Several old landmarks familiar to travelers since the days of the gold stampede were damaged by the fire. Scores of citizens joined in fighting the fire, but it had made such headway before it was discovered that little could be done to check its progress.

BANK RATE IN BRITAIN IS REDUCED

Cut to 3 Per Cent Discount Rate in France Reduced to 2½ Per Cent.

London, May 1.—The bank of England reduced its discount rate today from 3½ to 3 per cent.

Paris, May 1.—The Bank of France reduced its discount rate today from 3 per cent to 2½ per cent.

New York, May 1.—The New York Federal Reserve Bank today reduced its discount rate to three per cent from 3½ per cent.

PROHIBITION ISSUE GROWING IN WASHINGTON

Open Fight in State Predicted as Anti-saloon League Increases Efforts

Dry Leader Says Candidates Supporting Modification Are to Be Futed

Seattle, May 1.—An open fight on the prohibition question in the State of Washington was predicted here today by political leaders following a speech yesterday before the Religious Workers' Educational League by E. W. Hicks, state superintendent of the anti-saloon league.

Challenging the policy leaders of the state to attempt modification of the state dry law, Hicks said his organization would "give out of politicians the state" any candidate supporting or advocating modification.

"The Literary Digest poll has a tendency to create in minds of short-sighted politicians ideas that this state will support modification of the dry law," Hicks said. "We are glad if it does it, but we are glad to see it open to do those things which are done in the past in the state."

"This means we will get them out into the open and will drive them out of politics and out of the state."

WILL ORGANIZE
The Anti-saloon League, Hicks declared, was better organized than ever before, and so certain that it would control the Legislature at the next session.

PLANES REPORTED CARRYING RUM INTO U.S. FROM ONTARIO

Detroit, April.—The Detroit Free Press says that the last two weeks a licensed air gut line with six planes has been flying into the United States from Walkerville, Ont., with capacity cases of liquor.

The exportations have been carried on under superior Canadian customs officers, the press says, in accordance with a recent ruling of the Provincial Government, which allowed liquor to be used by liquor importers.

Duncan B. Hall, manager of the corporation controlling the Walkerville

"CY PECK" FOR FERRY RUN TO SALT SPRING

Steam Car Barge Will Give Double Daily Service From Swartz Bay to Fulford

Car Ferry, Bus System and Freight Line Combine in New Transportation System

A double daily car ferry service, between North Saanich and Salt Spring Island, will be initiated early in June, when the car ferry Cy Peck, owned and operated by the Gulf Islands Ferry Company Limited, will go into service between Swartz Bay, North Saanich and Fulford Harbor, Salt Spring Island.

Simultaneous with the inception of the ferry the Vancouver Island Transportation Company Limited will commence operation on Salt Spring Island of a fourteen passenger motor bus, linking up all parts of Salt Spring Island with the ferry on a time table which will be strictly adhered to.

The Island Freight Company will operate a new truck specially equipped for the Salt Spring Island service. With its headquarters on Salt Spring the truck will daily make one trip to Victoria and return, collecting freight from all parts of the island and delivering packages from Victoria.

COL. PECK'S PROJECT
The new ferry service has been organized by J. S. H. Matson to give effect to urgent requests for marketing assistance by residents on Salt Spring Island.

The vessel to be placed on the service has been named the Cy Peck by Mr. Matson to mark the support Col. Peck gave to the campaign of the Junior Chamber of Commerce and (Continued on Page 21)

PLANE LANDS IN YARD OF HOUSE

Vancouver, May 1.—Wishing to visit his friend, James Francis of No. 1 Road, Steveston, before proceeding to Vancouver, J. K. Baird, of Victoria, landed his plane in the back yard of Mr. Francis's home at 10:30 o'clock this forenoon.

After circling over Steveston to get his bearings, Mr. Baird landed in the back yard of Mr. Francis's home. His arrival caused considerable excitement.

After a brief visit Baird took off for the airport on Lulu Island, where he landed safely.

Mr. Baird, who is flying a low-wing monoplane of the light type, expected to return to Victoria this afternoon.

PLUMBERS WIN FIVE-DAY WEEK; NO PAY CHANGE

Rate Will Remain at \$1.12 an Hour, With Saturdays and Sundays Off

Victoria plumbers and steamfitters traded today went on a five-day week. It was announced by Alderman Smith, head of the plumbing and heating firm which bears his name, that the plumbers' union had won a five-day week for which they were fighting a reduction of four hours from the working schedule which has been in effect until today. It was explained: All Saturday as well as Sunday will now be vacation days for plumbers.

The wage scale will remain unchanged. The plumbers have been demanding \$1.10 a day, but the rate under the five-day week plan will remain at \$1.12 an hour.

On all contract work the five-day week will be enforced from today. It was explained, has been done so that union plumbers can meet the competition of all the one-man, non-union shops which are now operating here on small non-union jobs and show no consideration for the hours and wage scales set up by the union.

Only one of the bodies have been found.

DYNAMITE BLAST KILLS FARMER AND HIS WIFE

Vancouver, Wash., May 1.—A dynamite blast in a field near a farm here today killed a farmer and his wife.

The bodies of the couple were found in a field near the farm. The cause of the explosion is not yet known.

Only one of the bodies have been found.

Oom, Astronomer, Dies at Lisbon

Lisbon, Portugal, May 1.—Colonel Frederico Oom, famous astronomer and director of the National Observatory here, died last night.

HON. C. A. DUNNING, Minister of Finance

Three Local Marksmen Picked For Places On Canadian Bisley Team

Sgt. J. H. Regan, Capt. W. G. O. Holland and Sgt. Major W. H. Ruffell Will Sail With Team for England on June 13; Master Gunner Collings, Member of Last Year's Team, Gains Place But Is Unable to Make Trip.

Ottawa, Ont., May 1.—The Canadian Bisley team has now been selected, and will sail from Canada on June 13. Col. Birdwhistle, secretary of the Dominion of Canada Rifle Association, today announced the composition of the team that will represent Canada at the competitions of the National Rifle Association, and which will again defend the celebrated Knapton Cup for the short range championship of the Empire, and the many other trophies won by last year's team.

The team will sail on the Ss. Duchess of York from Montreal and will carry with it the Knapton Cup, the Grand Aggregate Trophy, the All-Canada Trophy, all of which were brought back by the 1929 team. The members of the team are selected from the highest scores in the Bisley aggregate at the D.C.R.A. meeting held at Connaught Ranges last August.

The team will be as follows: Commander, Lt.-Col. R. M. Blair, the Seaforth Highlanders, Vancouver, B.C.; adjutant, Lieut. Stewart W. Graham, 48th Highlanders, Toronto; Lieut. D. T. (Continued on Page 2)

THROUGH HEARS SPEECH MADE BY DUNNING

Crowd at Commons Doors Some Time Before Opening of To-day's Sitting

Great Interest Among People in Changes Under Budget

Ottawa, May 1.—Long before the doors of the House of Commons opened this afternoon crowds were gathered outside the doors leading to the galleries of the Chamber.

On every hand there was evidence of very great interest on the tariff statement to be delivered by the Minister of Finance, Hon. C. A. Dunning.

The preliminary proceedings occupied some minutes. Notice was given of a resolution for the establishment of a new Department of Fisheries and amid applause from the Government side of the chamber, Mr. Dunning rose to deliver his first budget speech.

Mr. Dunning emphasized these changes in an effort of retaliation. Indeed they offered to other countries an opportunity through reciprocal action on their part, to enable Canada to avoid extremes in duties.

CAMPAIGN OUTLAY TO BE INVESTIGATED

Washington, May 1.—Informed today by Mrs. Ruth Hanna McCormick that she had spent \$252,500 from her own purse in her successful race for the Illinois senatorial nomination, Chairman Nye of the Senate campaign investigating committee said: "We will investigate this thoroughly."

NEW YORK STOCK MARKET HAS DAY OF HEAVY DECLINES

New York, May 1.—The New York stock market went into another headlong decline today under the influence of acute weakness in the railroad shares, more than a dozen of which sold at new low levels for the year or lower. Losses of \$2 to \$5 a share were numerous in practically all groups of stocks, and a few extremes declined as much as \$15.

The liquidation of the rail shares reflected unfavorable earnings reports for the first quarter.

Speculation for a rise was resumed in the first hour, under the impetus of

Federal Sales Tax Cut to One Per Cent and New Countervailing Duties Set

In His First Budget Speech Hon. C. A. Dunning Says Parliament Is Asked to Approve Increases on Sixty-four Items and Decreases on Forty-six Under General Tariff and Changes Which Will Make 589 Items Free Under British Preferential Tariff; Duty on New Zealand Butter Is Increased From One to Four Cents a Pound; Tax on Sales of Shares of Stock to Be Reduced; Provision for Duty Year Round on Fresh Vegetables and Fruits Under General Tariff.

Ottawa, May 1.—Hon. C. A. Dunning, Minister of Finance, in his first budget speech in the Commons this afternoon announced:

Sales tax reduced from two to one per cent. Income tax made applicable to employees of Canadian companies living abroad.

Downward revision on the tax brought in the last year on the sales and transfers of shares of stocks.

Duty on New Zealand butter increased October 12 from one cent to four cents a pound.

Trade agreement now in operation with New Zealand will be terminated October 12.

Trade agreement with Newfoundland to be announced soon. Long list of tariff changes.

Increases in the general tariff on steel plate and structural steel, with duty lowered under the British preference.

A countervailing duty to make the Canadian tariff the same as in the country of export on certain commodities, including certain vegetables, eggs and grain.

Under the general tariff, sixty-six items of iron and steel have been reduced and forty increased. Under the intermediate tariff, eighty-six have been reduced and twenty-four increased, under the British preference 152 have been reduced, eight increased.

Bounty of 49½ cents a ton on Canadian bituminous coal used in smelting.

Duty removed on British-grown tea.

Reductions in duty on printing machinery.

Reductions on machinery not made in Canada, with increases when made here.

The numbers and important changes in the customs tariff were described by the Minister as an expression of the spirit in which Canada will approach the Imperial Economic Conference in a few months time. They were calculated, he said, "to serve the best interests of Canadian people, to increase greatly the British preference in the Canadian market and to enable Canada to buy more freely from those countries which buy from us most freely those commodities which are of vital importance to us."

PREFERENCE WIDENED

The Minister summarized his tariff changes as involving, under the general tariff, increases on sixty-four items and decreases on forty-six, and under the British preferential tariff, increases on eleven items and decreases on twenty. As a result of the revision, he stated, no fewer than 589 items in a total of 1,189 would be free under the British preferential tariff—an extension of the preference of a range of imports valued at \$200,000,000.

Regarding the countervailing clauses—which are a new feature in Canadian tariff schedules—Mr. Dunning emphasized these changes in an effort of retaliation. Indeed they offered to other countries an opportunity through reciprocal action on their part, to enable Canada to avoid extremes in duties.

These included, he said, no increase in the scheduled Canadian rates, on the commodities to which they applied, but were rather automatic provision for reciprocal rating when any other country imposed upon Canadian products rates higher than those enumerated in the Canadian tariff. The provisions would apply to butter, potatoes, soups, livestock, fresh meats, cured and pickled meats, shell eggs, frozen eggs, frozen poultry or albumen of eggs, oats, oatmeal, wheat, wheat flour, rice, cut flowers and cast iron pipe.

INCOME TAX CHANGES

Exemption from tax in case of cooperative companies and associations and wider range of exemptions in case of dependents of taxpayers.

Exemption from tax in case of donations to churches, schools, hospitals, etc.

Non-resident shareholders in family corporations and directors and employees of Canadian companies who reside abroad and are taxable under the act.

SALES TAX AND STOCK TRANSFERS

Reduction in the rate of the sales tax to one per cent.

Reduction in rates on sales or transfers of shares of stocks.

IRON AND STEEL

General adjustment of rates on all primary forms, with increases in rates on ingots, blooms and billets, sheet bars, etc.

Provision of a tariff group to cover ferro-alloys, all of which are made free under the British preferential tariff.

Increases in the rates, under all tariffs, on structural steel in certain shapes and weights commercially rolled in Canada, with reduced British preferential rates on very heavy sections and on all finished structural steel.

STEEL PLATE DUTY
Increases, except in the British preferential rate, on steel plates such as can be rolled in Canada; free entry under the British preferential tariff on all such plates when of widths and weights not rolled in Canada.

Provision for a British preference on all kinds of hot-rolled strip steel, for use in cold rolling.

Increases in the general tariff rates on most coated sheets, with provision for tinplate if and when made in Canada.

Provision for duties, after January 1, 1931, on black sheet imported from coating with metal.

Reduction, under all tariffs, in rates on corrugated sheets.

Provision for duties on skip, if and when rolled in Canada.

Provision for a British preference on saw steels, untempered, and extension of the existing preference on saw steels, tempered.

Provision for ad valorem surtax on allotted steels.

Extension of the existing British preference on wire and springs.

FARM MACHINERY

Free entry under British preferential tariff on all agricultural machinery.

Reductions in all rates on tractors valued at more than \$1,400, regardless of use.

Reductions under all tariffs on a wide range of printing machinery and equipment, used in the cartography of the British preferential tariff.

Reductions, generally, on machinery used in the tanning and curbing of leather, and on the cartography of lignite coal, and for the making of metal keys for food containers.

ROAD MACHINERY
Free listing under the British preferential tariff, and reductions under all tariffs, on all non-specified machinery, engines, boilers, electrical equipment, etc., which is of a class not made in Canada, with increases under the general tariff on all such machinery and apparatus of a class or kind made in Canada.

Reductions in the British preferential rate on typewriters, dictating, adding and calculating machines.

FOR HOUSEHOLDS

Reductions, generally, on sewing machines, vacuum cleaners and polishers and domestic refrigerators.

Free entry under the British preferential tariff, and reductions under all tariffs, on all kinds of heating and cooking appliances, with an increased general tariff rate on gas stoves and ranges, etc.

COAL FOR STEEL MAKING
The Minister introduced legislation, under the budget resolutions, to provide for the payment of 4½ cents a ton on bituminous coal mined in Canada, then converted in Canada into coke and used in the production in Canada of pig iron or steel, such legislation to be operative so long as a rebate of duty is granted on bituminous coal imported for these identical purposes.

(Continued on Page 17)

HIGH LIGHTS OF DOMINION'S BALANCE SHEET

Ottawa, May 1.—Highlights in Canada's balance sheet as given by Hon. C. A. Dunning, Minister of Finance, in his budget speech in the Commons this afternoon were:

Total ordinary revenue for the fiscal year 1929-30 was \$440,506,000, of which the revenue from taxation was \$378,321,000. Special receipts and credits brought the grand total revenue up to \$447,322,000.

Total ordinary expenditure for the fiscal year was \$380,650,000. Added to this were special expenditures (such as reparations), capital expenditures (such as public works), loans and non-active advances, making the total expenditures \$405,415,000.

Surplus of revenue over expenditures \$41,672,000.

Unmatured funded debt was \$2,330,537.36.

Reduction of debt in last five years out of surplus revenue totaled \$257,900,000.

CUSTOMS TARIFF CHANGES

Changes in customs tariff announced by the Minister involved some 500 items. These changes may be said to fall into two or three main divisions, important revision being as follows:

Free entry under the British preferential tariff, and reductions under all tariffs, on an extensive list of road-building and construction machinery, and on fire-fighting equipment and appliances.

Free listing under the British preferential tariff, and reductions under all tariffs, on all non-specified machinery, engines, boilers, electrical equipment, etc., which is of a class not made in Canada, with increases under the general tariff on all such machinery and apparatus of a class or kind made in Canada.

Reductions in the British preferential rate on typewriters, dictating, adding and calculating machines.

FOR HOUSEHOLDS

Reductions, generally, on sewing machines, vacuum cleaners and polishers and domestic refrigerators.

Free entry under the British preferential tariff, and reductions under all tariffs, on all kinds of heating and cooking appliances, with an increased general tariff rate on gas stoves and ranges, etc.

COAL FOR STEEL MAKING

The Minister introduced legislation, under the budget resolutions, to provide for the payment of 4½ cents a ton on bituminous coal mined in Canada, then converted in Canada into coke and used in the production in Canada of pig iron or steel, such legislation to be operative so long as a rebate of duty is granted on bituminous coal imported for these identical purposes.

FRUIT AND VEGETABLES

All fresh vegetables and fresh fruits are made free under the British preferential tariff, with provision for a duty, effective the year round, under the general tariff.

Extensions of the existing British preference are made on prepared vegetables, soups, etc., and on canned meat.

Evening Red
Parties are seeing red these spring evenings. The most fashionable red is vivid, like laquer red, but slightly lighter in tone.

YOU'RE THE THIRD PERSON THIS WEEK WHO HAS ASKED ME HOW I GET MY LINENS SO SNOWY!

JUST LOOK AT THIS TABLECLOTH. I NEVER SAW SUCH WHITENESS!

I JUST SOAK MY CLOTHES IN CREAMY RINSO SUDS. THEY COME OUT SNOW-WHITE WITHOUT A BIT OF SCRUBBING

HOW THAT MUST SAVE THE CLOTHES! I'M GOING TO GET SOME RINSO TODAY

Gleaming white washes with this safe soap!

WHEN millions of women will use no laundry soap but Rinso... you can be sure there's a reason! And the reason is that Rinso washes clothes whiter, safely. In Rinso's thick suds, the dirt soaks right out. Clothes come so snowy, even boiling isn't needed. This scrubless way of doing the wash saves hands from becoming red and rough.

Rinso is granulated, compact. One cupful gives more suds than two cupfuls of light-weight, puffed-up soaps. The makers of 37 leading washing machines recommend it. Get the BIG package. Try it for dishes, too.

Rinso
The granulated soap for tub or washer

OPERATIONS OF THE C.N.R. ARE REVIEWED

In Budget Speech Dunning Tells Commons Also of Merchant Marine Operations

Seven Harbor Commissioners' Developments Aided By Federal Government

Ottawa, May 1.—In his budget speech in the House of Commons this afternoon, Hon. C. A. Dunning, Minister of Finance, briefly reviewed the financial commitments of the government in the last year in connection with the operation of the Canadian National Railways and Steamships, the several harbor commissions and the Canadian Farm Loan Board.

"These separately operated bodies," he said, "receive assistance from the Treasury, either directly, in the form of cash loans, or indirectly, by way of the guarantee of securities. The practice in past years, so far as the public accounts are concerned, has been to rate cash loans which pay interest as active assets and those that are not as non-active assets. The guaranteed securities, which are issued in respect of capital investments, are shown in the balance sheet as indirect liabilities. The same course has been followed this year.

CANADIAN NATIONAL RAILWAYS
"Under the extraordinary business conditions prevailing last fall, particularly with reference to the crop movement," said Mr. Dunning, "earnings of railways were severely reduced. The accounts of the Canadian National Railways for 1929 show net earnings of \$38,889,058 available to pay interest on securities in the hands of the public. Interest charges amounted to \$45,258,920, the resulting deficit being \$6,369,862. This result reflects not only the loss in revenues due to the causes mentioned, but all the increase in fixed charges resulting from the large necessary expenditures which have been undertaken in recent years on capital account for branch lines, terminals, rolling stock and other additions and improvements.

SUM PAID
"Without going into greater detail, it will suffice to say the government has paid the amount which officers of the company have certified as being the combined net cash deficit for the railway years 1928 and 1929 and which amounted to \$2,322,652.91. The amount paid was greater than the actual difference between the system's deficit of 1929 and the surplus of 1928, due to the fact that certain items which take their place in the accounts are eliminated when estimating cash requirements, the most important item being the 1929 surplus on the Grand Trunk Western, which is now dealt with separately for financing.

MERCHANT MARINE
"The current financial requirements of the Canadian Government Merchant Marine Limited amounting to \$1,028,907.21, mainly for operating deficits, and interest, have also been paid in cash as loans (non-active) to those corporations. In addition, \$4,526,645 has been paid as a charge on Consolidated revenue funds in respect of the eastern liner of the Canadian National Railways for deficits arising over the above amount represented by the reductions in tolls under the Maritime Freight Rates Act. The amount, therefore, which the government paid in the past fiscal year as a direct charge on its revenues in respect of these transportation services, is \$9,960,595.10, made up as follows:

Canadian National Railway Company, \$2,322,652.91; Canadian Government Merchant Marine Limited, \$1,028,907.21; Canadian National (West Indies) Steamships Limited, \$862,389.98; Eastern Lines, Canadian National Railway, \$4,526,645; guaranteed securities, \$9,960,595.10.

GUARANTEED BY DOMINION
The guarantee of the Dominion was given in 1929 to bond issues of the Canadian National Railway Company aggregating \$120,000,000. There were two issues of \$60,000,000 each, one dated July 1, 1929, and the other October 1, 1929, bearing interest at 6 percent and maturing in forty years, subject to prior redemption. The issues were sold to the highest bidder. The proceeds of these flotations were devoted, in part, to the payment of \$40,000,000 of temporary loans outstanding at the end of 1929. The remainder has been or will be used for general purposes as provided in the general railway budget or authorized under special acts relating to the acquisition of railways and construction of branch lines and terminals.

HARBOR COMMISSIONS
"During the fiscal year, the Treasury has been called upon to finance capital expenditures of the several harbor commissions amounting to \$10,436,000. Details of the loans made to them are

Montreal harbor commission \$4,336,000, less national ing, loan repaid, \$1,000,000	\$3,336,000
Quebec harbor commission	2,821,000
Three Rivers harbor commission	136,000
St. John Harbor commission	815,000
Halifax Harbor commission	1,711,000
	\$10,436,000

"During the year the Board of Audit, upon direction of the Treasury Board, made investigations into the financial affairs of the various harbor commissions," continued Mr. Dunning, "reports have been received from the board and tabled in the House. Some recommendations are made, particularly with respect to provision of sinking funds and replacements which will have the attention of the government and commissions concerned.

CANADIAN FARM LOAN BOARD
"The Canadian Farm Loan Act authorized the government to provide an initial capital not exceeding \$5,000,000 for the operation of the board, and also requires the Dominion to subscribe for capital stock to the extent of five per cent. Of the loans outstanding initial capital paid by the Dominion Treasury to the board in 1929-30, the first year of the board's operations, amounted to \$2,400,000, and subscriptions to the capital stock to \$50,023."

CUT IN SALES TAX INVOLVES LARGE TOTAL

Dunning Tells Commons It Means \$22,000,000 a Year

Ottawa, May 1.—Hon. C. A. Dunning, Minister of Finance, in announcing during his budget speech in the Commons to-day that the sales tax would be reduced from two to one per cent, said it was estimated this proposal would bring a reduction in taxation of approximately \$22,000,000.

INCOME TAX
He said government or other like annuities would be exempt from income tax to the extent of \$5,000. It was proposed also that an exemption of \$500 each, the same as for dependent children, be granted for dependent parents, grandparents, brothers, sisters, sons and daughters, incapable of self-support owing to mental or physical infirmity.

VALUATION PLAN
In connection with the customs tariff, he said an amendment was proposed to the excise taxes in foreign countries and the valuation of special or dumping duty.

At present, excise taxes were not added to cost in valuing goods for duty which came from Great Britain, and it was proposed to extend this provision to all countries, the products of which entered Canada under the immediate or any more favorable tariff.

NEW LIQUOR PLAN FOR U.S. NOW STUDIED

Washington, May 1.—William H. Stetson, chairman of the board of the Association Against the Prohibition Amendment, testified to-day before Senate lobby committee that four members of the Hoover Law Enforcement Commission had told him they were "trying to work out some other plan for distribution of liquor than under the present law."

THREE LOCAL MARKSMEN PICKED FOR PLACES ON CANADIAN BISLEY TEAM

(Continued From Page 1)

Burke, the Governor-General Footguards, Ottawa; Co. Sgt.-Major Geo. M. Emile, 46th Highlanders, Toronto; Major C. R. Crover, Quebec; Col.-Sgt. J. V. Austman, Regina Rifles, Kingston, Sask.; Lieut. J. N. Dow, 7th B.N.C., M.G.C. Saint John; Lieut. A. C. Cater, Toronto Regt.; Toronto Sgt. J. H. Reardon, Canadian Scottish, Victoria; Co. Sgt.-Major A. M. Parnell, R.M.R., Montreal; Co. Sgt.-Major H. A. Timbrell, Toronto Scottish, Toronto Capt. W. G. C. Holland, Canadian Scottish, Victoria; Sgt. F. Hobbs, Royal Grenadier, Toronto; Lieut. J. A. Bowen, Alberta Dragoons, Edmonton; Co. Sgt.-Major E. Rusak, Ottawa Highlanders, Ottawa; Sgt. C. W. Foss, the Black Watch, Montreal; Capt. J. E. Foreman, P.I. (A. and B. Regt., Hamilton; Co. Sgt.-Major J. Jamieson, 46th Highlanders, Toronto, and Sgt.-Major W. H. Ruffell, R.C.A. Victoria.

The following, having won their places in the Bisley agreement, found it impossible to accept a place on the team: Lieut. James Bea, R.O., Montreal; Master Gunner H. Collings (S. C.), Victoria; Lieut. James W. Houlden, Sherbrooke Regt., Toronto; Sgt. J. W. A. Sharpe, Victoria Rifles, Montreal; and A. C. O. Wilkinson, R.C.A.F. Camp Borden.

The team will assemble in Montreal on June 12, when it will be inspected at the armory of the Victoria Rifles. In the evening the party will be tendered a farewell dinner on board the Duchess of York, and will sail the following morning.

RARE LANSDOWNE MARBLES ON LONDON AUCTION BLOCK AND OLD MASTERS TO GO

Reuter's Special to The Victoria Times
London, May 1.—The sale of the historic Lansdowne Marbles this month is likely to be the most sensational sale of its kind since the Hope Marbles were put up for auction during the War.

Lord Lansdowne is giving members of the National Art Collections Fund opportunity to view the marbles at Lansdowne House.

The whole collection would be a wonderful gift for the British Museum, though its purchase on bloc would probably be an impossibility without the generous offer of some millionaires. There are several pieces in the acquisition of which the fund would like to help. Some of them, for instance, would be the bust of Athens, the wounded Amazon by Polykleitos, and the wonderful marble of Heracles, probably the greatest treasure of them all.

The collection of old masters, drawings and engraving from Lansdowne House is also to be sold by Christie this month. It contains a group of portraits by Reynolds, and others by Gainsborough, Lawrence, Titian, Tintoretto, and Velasquez, as well as paintings by Vandyck, Murillo, Poussin, and such Italian masters as Giorgione, Carracci, Guido Reni, and Andrea del Sarto. No fewer than seven portraits ascribed to Reynolds are catalogued for sale. There is a small one of D. Johnson in brown coat, vest and wig; another of David Garrick in the brown suit he commonly wore at such sittings; a portrait of Reynolds himself, a notable pair of Henry Thrale and his daughter "Queenie," who afterwards became Lady Keith of Tillyland.

Another picture that comes into the Johnsonian collection is that of Joseph Marretti, a dictionary maker, and this and the portraits of Johnson, "Queenie" Thrale, and Reynolds himself are probably copies made when the pictures in

CROWNING GLORY

OVER 12 MILLION JARS USED YEARLY

the famous Thrale collection. Streatham were sold in 1818. Authentic works by Reynolds are those of David Garrick, Henry Thrale, and Elizabeth Drax, Countess of Berkeley.

Dull Hosiery
It is no longer considered au fait to let your leg shine. Helping out the long skirts in this matter are dull, crepey, worn silk hosiery.

Suit Flowers
Some suits do not need a flower. Try wearing one or a little boutonniere at the V neckline of your blouse. It is a new trick and a cute one.

Smooth Wall Paper
If your rooms have been papered twice or even once before, you will get a much neater job with new paper by removing all previous paper.

A Tip

...From.....
Andrew Carnegie

ASKED to explain his phenomenal success, Andrew Carnegie blandly attributed it to his ability to get men to work for him who knew more than he did.

And that's a formula for success. Nobody who is really successful does all the work himself. He employs other people's minds and efforts.

Do you do the same in the intricate business of running your home and taking care of your family? You can, quite easily.

You can employ specialists in diet; you can serve the master dishes of famous chefs; you can have the advice of style authorities in selecting your clothes, of whole electrical laboratories in buying household appliances, by reading the advertisements.

All the newest knowledge—knowledge millions of dollars and years of effort have won—is contained in the advertisements.

If you will use the advertisements in this newspaper as Andrew Carnegie used men who knew more than he did, every dollar you spend will be spent wisely, economically, and will return full measure of satisfaction. That's the way to be a success in the greatest business in the world—making a home.

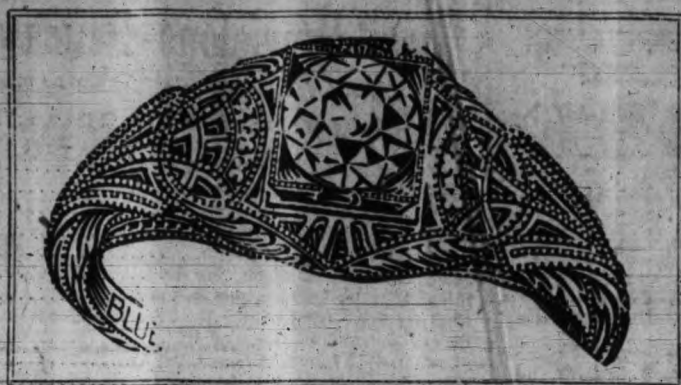

It Pays to Read the Advertisements

THE HOUSE OF QUALITY

May Has Always Been the Favorite Month for the Engagement Ring

For that reason we have just placed in stock the largest assortment of the latest designs at popular prices ever shown on the Island.

The ring shown above, as well as many other designs, including the always popular step mounting, is being shown at prices from \$45.00 to \$150.00, according to the size of the diamond. We extend to you an invitation to take advantage of our time payment plan, it is easy and convenient, and you have the use of the ring while paying for it. A small payment down places the ring in your possession. Then small payments at regular intervals, "pay us as you are paid."

Whether you intend buying at the present time or in the future we will be glad to show you through our truly beautiful range without obligation on your part.

Fund Provided For New Fight Against Cancer

Del Monte, Cal., May 1.—The California Medical Association was on record today as commending Dr. Walter B. Coffey and Dr. John D. Humber, both of San Francisco, for their dis-

covery of an experimental extract for the treatment of cancer. With the passage here yesterday of the resolution of commendation, formal announcement also was made that three wealthy San Franciscans had raised \$500,000 to support the work of the Coffey-Humber Cancer Clinic in San Francisco. The financial backers are Herbert Fleischacker, banker; Stanley Dollar, shipping magnate; and Paul Shoup, president of the Southern Pacific Railroad.

TWO GUARDS ARE KILLED BY FISHERMAN

San Francisco, April 30.—Antonio Anderson, sixty, a fisherman, shot and killed two officers who sought to arrest him for alleged illegal use of nets in the lower bay of Burlingame today and then, despite five bullet wounds in his body, slipped his tiny smock ten miles to Fishermen's Wharf to give himself up.

Those killed were Allan G. Curry, twenty-nine, deputy state fish and game warden, and Jack Burke, forty-eight, former game warden.

First intimation of the tragedy came when Anderson's boat yawed crazily into Fishermen's Wharf towing two small boats.

Sprawled on the cabin roof were the bodies of the two officers, and huddled over the wheel was Anderson, bleeding from wounds which physicians believed would cause his death. Both lungs were punctured by revolver bullets, his right arm was shattered and there were wounds in his left arm and right hand.

Move For Lower Rates on Grain Is Opposed

Ottawa, May 1.—Montreal and Toronto, through their respective Boards of Trade, joined in opposition yesterday to the application for lower grain freight rates for St. John and Halifax. Briefs in opposition to the application of the Halifax Harbor Commission and the Maritime Board of Trade were filed before the Board of Railway Commissioners of Canada. The Maritime ports are seeking a reduction in the grain rate from 25.5 cents per hundredweight to 19.4 cents. It would apply only to the National Transcontinental line.

FRECKLES

Tells How to Rid Your Complexion of These Ugly, Rusty-Brown Spots

If you freckle easily, yet find these blemishes hard to remove, read what thousands of women do to fade out every last freckle and gain a clear, beautiful complexion. They use Othine and no longer dread the summer sun and winds.

You, too, will find that after a few nights' use of this dainty white cream even the worst freckles have begun to disappear while the lighter ones have vanished entirely. It is seldom that more than an ounce of Othine is needed to clear the skin of these ugly blotches.

Be sure to ask at any drug or department store for Othine double strength. It's always sold with guarantee of money back if it does not remove even the worst freckles and, also, a lovely, milk-white complexion. (Adv.)

PRINCIPAL URGES CANADIAN HISTORY FIRST IN SCHOOL

See Canada First Instead of Old Country, Ontario Teachers Told

Toronto, May 1.—Canadian teachers must be "sold" on Canada, W. D. Lowe, principal of the Windsor-Walkerville Technical School, told the Technical School Section of the O.E.A. in his presidential address. He approved Premier Ferguson's actions in giving Canadian history a foremost place on the high school curriculum.

"Just now our teachers' mail is flooded with announcements of tours, many of them to the Old World. Have we not been fettered to the Old World long enough?" queried Mr. Lowe. "Why visit the Alps if you haven't seen the Canadian Rockies?"

Canadians are lamentably lacking in appreciation of their own country, said the speaker.

FINEST COUNTRY
"A Canadian doesn't know—although he should—that he has the finest country in the world, or he wouldn't let thousands of his fellow countrymen leave it year after year, without fully informing them of the fact," he added, declaring that Canadians have a "false modesty" about their country. He would paraphrase Sir John A. Macdonald's "A British subject I was born, a British subject I will die," and "A Canadian subject I was born, a Canadian subject I will die."

"I refuse to admit that Canada is or should be a mere adjunct of England," continued Mr. Lowe. "I think the day will inevitably come when Canada will far outstep the Motherland in wealth and population. But that Canada will ever forget her debt to the Motherland of her obligations to the Empire is, I believe, inconceivable."

WAY PREPARED FOR CARAVAN TO HAZELTON

Two Representatives Return to Vancouver After Motor-ing Far North

U.S. Governors, B.C. Leaders and Others to Start Trip June 14

Vancouver, May 1.—Having completed a journey of more than 1,800 miles over British Columbia roads, R. A. McNeil and Major J. Gordon Smith of the Bureau of Provincial Information are back in this city.

On their arrival from Hazelton Tuesday evening they reported the route to the north was in far better condition than for corresponding periods in former years. This, it was said, was largely due to the winter work, the main highways having been kept open during the winter by means of snow-ploughs.

Although their car was the first automobile to make the trip from Vancouver to Hazelton this year, the journey to the end of the road and back was made with but a single puncture. The two Government representatives planned the trip in order to make preliminary arrangements for the Vancouver-Tukon-Alaska Highway caravan, composed of United States officials and newspapermen, which will leave Vancouver June 14 to cover the road to Hazelton.

FIFTY IN PARTY
According to present arrangements, it is said, the party will consist of between forty and fifty persons. Included in the number will be several members of the British Columbia Government, Governor Parks of Alaska, Major Malcolm Elliott of the U.S. Alaska road commission and, it is expected, the Governors of Washington, Oregon and California. Lieut.-Governor R. Randolph Bruce, it is anticipated, will also accompany the party to the "land of the golden twilight."

While localities in central British Columbia are feeling the general depression due to lower metal prices, according to Mr. McKelvie, there is a feeling of optimism and a new interest in land settlement and development. The immense area of fertile lands, comprising several million acres, in the Nechako and Bulkley valleys and in the Francois and Omineca lakes district, is especially claiming attention.

RASHLY CLEARED
These lands, which are easily cleared, being covered for the most part with light poplar growth, are in the immediate vicinity of transportation, and it is claimed for them that they are equally as productive as those of the

Vancouver Island News Chemainus

Chemainus, April 30.—The regular monthly meeting of the First Chemainus Girl Guide Association was held Monday afternoon at the home of Mrs. Alexander. In the absence of the president, Mrs. Douglas Ross, Mrs. Walter Porter took the chair.

Mrs. George Neale, Brown Owl, gave a report on the recent Brownie concert, showing that the sum realized by the recent entertainment was \$66.75, leaving a balance of \$55.54 after all expenses had been paid.

A vote of thanks was given to Mrs. Neale, Mrs. Aiken and others, who helped to make the entertainment a success.

The subject of the Guides' summer camp was discussed. It was also decided that the Guides get up some form of entertainment to raise the necessary funds for camping. The parents as usual will pay \$3 for each girl for the ten days, the com-

mittee paying a like sum. Two gold stars for Guides will be purchased, one for Miss Enid Fraser, Lieutenant, and the other for Miss Coralie Fraser, acting Lieutenant.

Those present were Mrs. Work, Mrs. Porter, Mrs. M. L. Fraser, Mrs. George Neale, Miss White, Miss Greig and Miss Enid Fraser.

Mrs. Martin Casswell is visiting friends in Vancouver.

Mr. and Mrs. Joseph Sandland spent the week-end with relatives in Nanaimo.

Miss Blason is spending a vacation in Vancouver with friends.

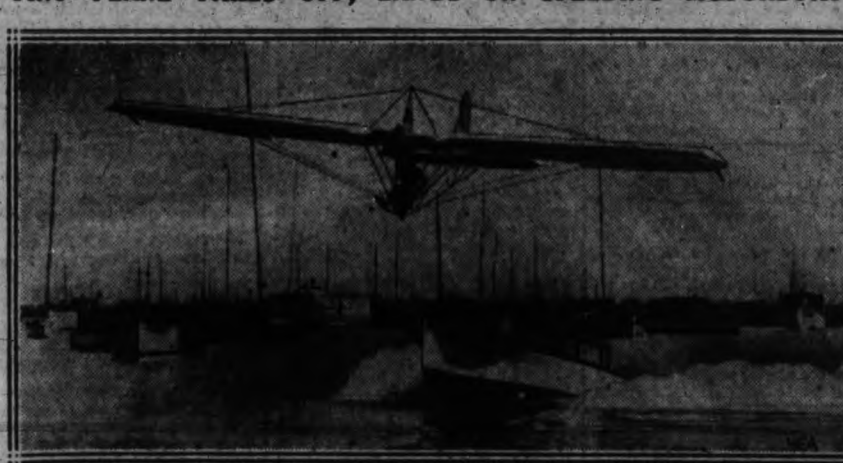

Basil Bailey and his son, Dick, have returned home to Vancouver after spending a few days in Chemainus the guests of Mr. and Mrs. W. M. Casswell.

Samuel Robinson, who has been a patient in the Jubilee Hospital, Victoria, for two months, has returned home to Chemainus and is convalescing.

GRAND TRUNK SHAREHOLDERS PETITION M.P.'S

Ottawa, May 1.—Three thousand first and second preference stockholders of the old Grand Trunk Railway residing in Great Britain petitioned the Commons yesterday for consideration of their claims in connection with the disposition of the properties of the railway located in Canada, the United States and Great Britain. The petitioners asked for "such relief as this House may deem to be best adapted to the necessities and merits of the case of the petitioners and most consistent with the rights of all parties." R. E. White, Conservative, Mount Royal, presented the petition yesterday afternoon. The House formally received the petition.

TINY PLANE TAKES OFF, LANDS ON SPEEDING MOTORBOAT

This unusual picture shows a crucial moment as two daring pilots risked their lives at Long Beach, Cal., to prove the feasibility of taking off and landing a small powered plane on a speeding motorboat. Although the slightest hitch meant disaster, the plane made several "conquests" on the twenty-foot deck while the boat was making forty-five miles per hour. The above picture shows one of the takeoffs.

MR. MARLER'S CALL TO BUSINESS

BRITISH COLUMBIA PRODUCERS OF fruit should be especially interested in the intimation from Hon. Herbert Marler, Canadian minister to Tokyo, that the Orient offers an excellent market for our apples and our canned fruit and vegetables. Mr. Marler reports that experimental shipments to Hongkong have made an excellent impression, of which full advantage should be taken without delay. He warns our producers, however, that they must be prepared to advertise their goods on as big a scale as that adopted by exporters in the neighboring republic.

The demand of the teeming millions in the Orient has been used as a theme for many speeches and newspaper articles in this country. It has been said time and again that a large share of the business of China and Japan and other Pacific countries should be done by Canada, especially by British Columbia in respect of numerous products either not produced at all or only in very small quantities in other provinces of the Dominion; but which we produce in excess of our own requirements. We in Victoria have grown so accustomed to hearing this cry called the first and last port of call for the great trans-Pacific liners that perhaps the expression has lost its significance for us. But a message like that from Mr. Marler once more brings us back to realities, makes us ask ourselves whether we are doing our part, or whether we are letting matters take their course.

The thing to remember in this highly-competitive age is that the merchant, the great corporation, the province or the nation which does not go after business is hardly likely to get it. Mr. Marler speaks of fruit and vegetables. This surely should be taken as a call to Vancouver Island as well as British Columbia and the rest of the Dominion. Long ago Luther Burbank visualized the Saanich Peninsula supporting a large rural population, compared with which the present farming communities would form but a small part. It is easy, of course, for the layman to say what we should be doing towards greater development of the rural areas adjoining this and other cities on the Island. But none will seriously confess that we have expended our maximum efforts to bring about the condition Mr. Burbank said could be produced.

Governments may assist producers to extend old markets and find new ones. We do not think two trade commissioners in the Orient—one in Shanghai and the other in Tokio—can hope to establish an organization adequate to cope with what we are led to believe is the growing demand of China and Japan. In the final analysis, however, it rests with the exporter. He must find out what goods are required and then advertise them for all he is worth. Business will not come to him by wishing.

AUSTRALIA'S GOVERNOR

THE SUGGESTION THAT A NATIVE-born Australian be the next Governor-General of the Commonwealth seems to have created quite a stir in the Antipodes. Premier Scullin is being branded by his opposition friends as anything but affectionate towards the empire, and some of the newspapers which do not agree with his political views are finding in his suggestion a new avenue of attack. Old customs disappear slowly; but when they do disappear most people are surprised they were allowed to exist so long. We do not profess to know what native-born Australian would be suitable for the post which Lord Stonehaven will relinquish next September. Surely there ought to be somebody who could fill the bill without offending the susceptibilities of anybody or without disturbing any empire associations.

The Irish Free State has had two Governors-General since it changed its political relationship with Great Britain. Both were native-born Irishmen and the country seems to have got along quite well during their regime; and if there is any important aspect of the discussion, the recent action of the Dail Eireann in re-electing Mr. Cosgrave as its President would seem to dispel any misgivings.

South Africa has discussed the same point; but does not seem ready to make any departure from the traditional custom. No doubt it sees a difficulty in finding the right man. The matter has been discussed in Canada, informally, perhaps, but with the knowledge that we have many who would make admirable representatives of the Crown.

A CANADIAN PROPOSAL

ONE OF THE MATTERS WHICH THE delegation of the Canadian Chamber of Commerce will introduce at the conference to be held in London this month is a proposal for the appointment of a commission of businessmen drawn from the various units of the empire to study empire resources, markets, and other factors entering into the stimulation or hindrance of interimperial trade, and to be maintained as a permanent economic commission of the empire.

It should be understood at the outset that such a body would operate purely on a consultative and advisory basis. It would resemble in some respects the Imperial Conference, which, of course, is merely a clearing agency for ideas and suggestions of general interest to the empire as a whole. It has no legislative authority whatsoever, although quite often certain recommendations which emanate from these gatherings afterwards are adopted by the various Dominion Parliaments as matters of policy.

The body which the Canadian Chamber of Commerce favors would include in its personnel government-appointed experts, and hold intermittent meetings in executive offices connected with chambers of commerce throughout the empire. The commission would have at its disposal, of course, all the information already accumulated; and, from time to time, have

prompt knowledge of economic conditions all over the empire as they developed.

It is not possible to predict the outcome of the Canadian proposal; but it will be submitted with the unanimous support of the empire trade committee of the Canadian delegation. At the head of this country's representation, by the way, will be Colonel J. H. Woods, of Calgary, the Dominion president, whose term of office so far has been marked by enthusiasm and industry which has added to his already ample knowledge of Canada and Canadian conditions.

SOMETHING TO CROW ABOUT

THERE IS SUCH A THING AS BLOWING one's trumpet a little too loudly and a little too often; but there also is such a thing as being altogether too modest about achievements which bear the unmistakable marks of initiative and progress. Canada has a great deal to be proud of which she has every right to be proud of. We are reminded of this by Mr. L. B. Jackes, writing in The Toronto Telegram, that:

Canada built and demonstrated the first compound steam engine in the history of the world. The effect of this invention was the doom of the sailing ship as a factor in ocean commerce.

Canada built and demonstrated the first submarine telegraph in the history of the world. The idea of the telephone originated in Canada, and the first long-distance trials of the instrument were made between Paris and Brantford.

Canada pioneered in the field of electro-chemistry with the discovery of calcium carbide by Tom Wilson, of Hamilton.

Canada originated the idea of standard time, which has since been adopted by every civilized country in the world.

Canada built and demonstrated the first submarine telegraph in the history of the world.

Canada demonstrated the first practical electrical railway in the history of the world.

Insulin is of too recent date to require more than mention in this list.

Canada built and demonstrated the first railway sleeping cars.

Canada built and sent the first steamboat across the Atlantic.

Canada gave to the world the idea of the all-electric radio.

Canada originated the idea of making paper from wood pulp.

Canada first isolated helium in commercial quantities.

Canada originated the idea of the panoramic camera.

Canada originated the idea of electric heating.

Canada built the world's first electric stove.

To this collection of achievements which Mr. Jackes has set down may be added a few facts about Canada's supremacy in other things. There are too many to quote in the space at our disposal here; but a few may enlighten those who do not realize our important position in this regard. This Dominion holds the lead as follows:

In fur farming production.
In wheat and flour exports.
In world's wheat championship.
In railway mileage per capita.
In high-grade wheat standards.
In the world's per capita trade.
In newspaper production in the world.
In hydro-power development per capita.
In the empire's largest telephone exchange.
In life insurance per capita in the empire.
In the world's largest inland port—Montreal.
In world's largest number of its kings—Tall.
In world's longest publicly-owned railway—C.N.R.
In largest single-unit elevator in the world.

It is well for Canadians to keep a few of these things in mind when talk of "inferiority complex," and suggestion of economic or other dependence, smites their ears. The achievements enumerated above, the lead we have in many things over other countries, cannot be challenged. But other triumphs will be scored as we develop our vast resources and add to our population.

WHAT OTHER PAPERS SAY

CANADIAN MUSIC

As a fitting climax to the series of symphony concerts broadcast across Canada, the Canadian National Railways devoted the last of the series entirely to the work of Canadian composers. The twenty-five concerts have definitely broadened and deepened the love of fine music in Canada, and beyond doubt have permanently increased the size of the radio audience. Canadian music-lovers who heard the compositions of their countrymen could not escape a thrill at the thought that in this single hour more was done for the recognition and acclaim of Canadian composers than could have been accomplished by months and years of effort unassisted by the magic of radio.

Perhaps it is not at all important, as a stimulant to his creative faculty, that a composer receive popular recognition. Some great composers have gone through life without it. But it is important for a nation to know and recognize its own genius.

Canada is a brighter image in the hearts of its citizens today as a result of yesterday's broadcast, and the Canada of tomorrow will be richer by scores of yet unwritten melodies. To-morrow's music will ring with a timeless yearning for the beauty that is Canada, will breathe in a thousand timbres the glory of life in a land where Nature can be stern as granite or as smiling as the sun.

DEALING WITH UNEMPLOYMENT IN U.S.A.

Four constructive suggestions were made by Governor Frank G. Allen of Massachusetts, as follows:

"1. Refrain from magnifying the extent of unemployment, which a great many newspapers do, for the reason, I suppose, that it is news."

"2. Suggest that municipalities, business organizations and individuals advance such work as can be undertaken at this time, particularly odd jobs which would furnish employment to casual labor. To a considerable extent unemployment at the present time is temporary unemployment when business is less active."

"3. Call attention to the fact that in every year owing to seasonal conditions, the maximum unemployment occurs in January and February, and with the approach of spring, when outside work may be undertaken, much of the casual labor is absorbed in the building trades, agriculture, transportation (track ballasting), and work in connection with outdoor recreational and amusement enterprises, hotels and restaurants, and numerous other lines of employment which are suspended during the winter months."

"4. Urge that local communities establish public employment offices so their own citizens may register giving their qualifications and their need of work and that they in turn should endeavor to keep them from drifting to the larger cities, which are already overcrowded with those seeking employment."

A THOUGHT

Praise the Lord; for the Lord is good; sing praises unto His Name; for it is pleasant.—Psalm cxxxv. 3.

You may be liberal in your praise where praise is due; it costs nothing; it encourages much.—Horace Mann.

Loose Ends

A great historic event is found to be transpiring in secret across James Bay—The Toimie Government wisely takes the advice of this column—With results which will stand for all generations.

By H. B. W.

A TREMENDOUS EVENT is transpiring, all unknown, beneath our very noses, in our own Parliament Buildings, across James Bay. The Toimie Government, according to a Vancouver writer, who seems to be in unbroken communion with that body, is secretly preparing to lay a new carpet in the Legislative Chamber; and if you want to know how tremendous an event that is, you have only to refer to the back of this column. A hostile, of course, to assume that the Toimie Government's world-shaking decision was dictated entirely by this column, and yet the coincidence is peculiar. It was only a short time ago that this column raised its broken-hearted appeal for a new carpet to replace what has become the worst blot on our public life—Now, behold, it is revealed that the Government has rallied to the cry which this column, like a voice crying in the wilderness, alone voiced with alarm. The coincidence, repeat, is peculiar. Well, the Toimie Government could not go to any better source of advice than this right here.

HAVING WISELY accepted this column's advice, the Toimie Government is also revealed, is about to go still further. It is designing such a carpet as the world has never seen before—a carpet which will make the floor of the Legislative Chamber more interesting, more elegant, more informative even than the men who stand on it; which sometimes would not be very difficult. On the same unimpeachable authority of the Vancouver writer, who knows the profound mysteries of the Government's mind, it is announced that the new carpet will not be for show alone, as is the present one, with its garish coat-of-arms and huge gaping spaces of ghastly crimson. Instead, the new carpet will be a mighty history of our province.

Into its warp and weft will be woven thrilling pictures of those events which made our greatness, from the voyage of Captain Cook down to the last Shelly Budget. Thus spectators in the public galleries, whatever they may fail to learn from the speeches by mouth, will find in the new carpet a rich storehouse of knowledge, concerning their homeland. For the young this will be invaluable.

HOW FASCINATING it is to speculate on the probable contents of this new and graphic record, and to hope that a competent historian is employed in designing it. In it, no doubt, will be pictured the commanding figure of Sir James Esq. giving a nice red Hudson's Bay blanket to every Indian who supplies four tin-pots for the stockade of old Fort Victoria; the famous "Reverend" who, the embattled citizens of Victoria, annoyed over the Terms of Union, marched across James Bay, stormed the "Bird Cages" and drove the Legislative Assembly home for the evening; that glorious moment when the whole Legislature marched out in protest against the aggression of Joe Martin's Government, while the speech from the Throne was being read by the unhappy Governor; and other stirring times which proved to the world the vigor of our Island stock.

THOSE WHO are chosen to design this moving history should not overlook some of the modern events which prove that the vigor of our Island stock is still unimpaired, despite everything. I hope, for instance, that they won't neglect that famous "win" which in the House when Mr. Ian MacKenzie offered to knock his friend, Mr. Pooley, "as far as his good right hand would knock him," an offer which, unhappily for the gaiety of public life, was not accepted. The tall, slim figure of Mr. MacKenzie, with upturned and the grim determination of Mr. Pooley would make one of the most interesting pictures in the whole collection. I feel, too, that the new carpet should picture that delicious debate in which, during a bewildering series of motions and counter-motions, some country member shouted, "Oh, hang it, let her go the way she looks!" and the desperate Speaker said solemnly to the Legislative Assembly of British Columbia: "It is ill moved that we let her go the way she looks," and would have put the motion, too, if the scandalized intelligentsia had not protested.

THERE SHOULD be some record of the evening when the late Premier John Oliver stoutly refused the request of some of his more sporting supporters that Mr. Gene Tunney, "that prize-fighting fellow," be allowed to sit on the floor of the House as a distinguished visitor. I hope they will remember to be able to reproduce those Titanic struggles between Mr. Oliver and Mr. Bower, the like of which we shall not look upon again. Mr. Bower, for instance, leaning across his desk, jaw outstretched, you fancy how, glaring at the Premier and accusing him of stealing the Conservative election policy; Mr. Oliver, with a thundering roar of laughter, retorting that he was even then showing his contempt for the Conservative election policy by sitting on that document; and Mr. Bower barking back, quick as a flash, that he hoped the Premier would continue to sit on it, for thus he might incubate some useful legislation therefrom.

COMING TO modern times, I feel sure the public of this province, who will never be satisfied and history will never be adequately served if the new carpet fails to picture that scene, familiar to every British Columbian, through the election speeches of the present Prime Minister—I mean Dr.

SPRINGTIME
Is
FIREPLACE
Time

For Your Grate Burn
KIRK'S
Large, Blochy, Heat-producing
LUMP COAL

"Does Last Longer"

Kirk Coal Co. Ltd.
Phone 139 1234 Broad St.

Toimie in London eating "de-horned strawberries" with the British aristocracy, all dressed up in his "faded front" and the unforgettable picture which that same gentleman loves to paint of himself as a boy "chaperoning a Jersey bull" at the Willows, which caused a spectator to ask which of the two was the animal.

UNHAPPILY, UNTIL still another carpet is made a generation or so hence, the events which will transpire in the next quarter of a century will have no place in this gallery of stirring memories. Perhaps it would be better, then, to leave some space for the new carpet for the notable happenings which may occur in the remainder of our lifetime. A generous space, near the very centre of the chamber, should be left for the brilliant picture which will show the Government selling the Pacific Great Eastern Railway. And another, close by, in dazzling colors, of the same Government reducing taxation. Unfortunately this splendid carpet may be badly worn by the time those pictures are ready.

The Weather

Daily Bulletin Furnished
by the Victoria Meteorological
Department

Victoria, May 1.—5 a.m.—The barometer remains stationary on the coast and rain has ceased over Southern B.C. Rain has fallen in Saskatchewan and Manitoba.

Reports
Victoria—Barometer, 29.99; temperature, maximum yesterday, 67°; minimum, 47°; wind, S.W. 10; rain, 0.1; weather, cloudy.

Annual Meeting of Canadian
Press is Held in Toronto

Toronto, May 1.—At the annual meeting of the Canadian Press here yesterday, directors were elected as follows:

OIL BRINGS RICHES

"Happy days are here again" for Bob Cook and Dot Outman, until recently three-day vaudeville singers and dancers, who have been lifted suddenly to wealth by the finding of oil on their land adjoining the great Mary Sudik gusher in Oklahoma. Mr. and Mrs. Cook, whose home is at Muskogee, Mich., say they recently refused an offer of \$1,000,000 for their Oklahoma farm, preferring to take royalties then running \$7,400 a day. They have retired from the stage.

Cup of Hot Coffee Often Helps to Avert "Sick Headache"

In an analysis of the various measures used in the treatment of sick headache, Dr. Frederick Tilney emphasizes the importance of distinguishing this type to many other causes.

The sick headache attack is likely to begin with a feeling of chilliness and of dizziness. The vision seems to become blurred. At such times, Tilney feels that a cup of hot coffee will help to avert the serious development.

After the sick headache develops, the pain is relieved by the use of various remedies, most of which are of such strength that it is necessary to have a physician's prescription in order to use them successfully. The physician keeps in mind the danger of prolonged use of various coal tar products such as acetanilid, antipyrine or acetphenetidin. He knows also the danger associated with the repeated use of morphine or other narcotics to relieve the pain.

Just as important as the treatment of the acute attack is the treatment that is given to the person between attacks in order to diminish their number or perhaps to prevent them altogether. Dr. Tilney feels that the most important single remedial agency is a careful routine of outdoor life and exercise taken in the form most congenial to the individual concerned. This should be written out and followed religiously. It must include proper instructions for diet, which should be light and easily digestible, and avoid constipation. The exercise should be golf or walking for those of advanced years, but may include more vigorous sports, such as riding or tennis, for younger patients.

Of special value are tonic baths, such as the cold bath following a warm bath, or a slightly lukewarm bath in the morning. It is not necessary for the patient to follow any special dietary fad. He must eat so as to secure effective and regular elimination and, if necessary, this may be aided by the proper use of mineral oil or similar preparations.

Just as it is necessary to control other forms of headache by a study of the relationship to conditions in the patient's life, so also must patients with migraine be carefully investigated to find out whether or not mental disturbances have a distinct relationship to the onset of the headache.

Dr. Tilney emphasizes particularly the way in which the haste and striving of modern living lessen efficiency and shorten life. He believes that more intelligent living is the utmost importance in controlling migraine.

WANTS TO HANG

Declaring that he is "too mean and low-down to live," Carl Panzram, above, an inmate of the federal penitentiary at Leavenworth, Kan., who murdered Supt. E. G. Warrick, wants to be hanged for his crime. He is under sentence of death, and if his sentence is carried out will be the first man to be hanged in Kansas in more than thirty years.

WINS MARATHON SEVENTH TIME

Winning the Boston Marathon has become a habit with Clarence H. de Mar. Here is the forty-two-year-old athlete—winner in this event for the seventh time—as he crossed the finish line after covering the distance of 26 miles, 385 yards in 3 hours and 24 minutes.

FLAPPER FANNY SAYS:

At least a motorist can't blame the other fellow when he runs into debt.

Sister Mary's Kitchen

The tang of cured fish often whets the appetite as the mildness of fresh fish fails to do. Professional cooks recognize this and frequently introduce a bit of preserved fish of some sort into their hors d'oeuvres to give zest to the concoction.

Fish may be preserved in several ways; salted, smoked, in oil, and in a weak vinegar solution.

These types of fish should be used more frequently than they are, for they are always available, and not expensive. Cod and mackerel are the commonest, but any large fish can be "salted down." Salt is delicious but not generally obtainable on the market. Salmon salted in a brine is very good and usually easy to find. Smoked salmon is a particularly delectable variety.

Any smoked fish can be substituted for the salmon in the casserole dish.

Casserole of Smoked Salmon
One and one-half pounds smoked salmon, 4 small onions, 1 cup peas, 1 cup diced carrots, 1 tablespoon lemon juice, 4 medium sized potatoes, 2 teaspoon pepper, 3 tablespoons butter, 1 cup milk, 1 1/2 cups dried bread crumbs.

Soak salmon. If very salty, put through two or three waters. Cut in pieces to serve and sprinkle with lemon juice. Melt butter in a shallow pan and add crumbs. Stir until crumbs are well coated with butter. Put fish in a well buttered casserole and sprinkle lightly with crumbs. Add alternate layers of peas, carrots, potatoes cut in thin slices, and onion peeled and sliced, and crumbs. Add boiling water to cover and bake slowly for one hour. Uncover and add milk. Continue baking for twenty minutes. Serve from

Celebrating
Our

260th

ANNIVERSARY

EVERY

SARV

SOME OF THE SPECIAL BARGAINS TO COME

We Are Just 260 Years Old To-morrow

On May 2, 1670, Hudson's Bay Company was founded. On that day King Charles the Second of England granted the charter of incorporation to "The Governor and Company of Adventurers of England trading into Hudson Bay." For 260 years Hudson's Bay Company has been in continuous operation, a record unequalled by any mercantile institution now in existence. To-morrow we specially invite our many friends to join with us in celebrating our anniversary—to take advantage of the exceptional savings we are offering in every department of the store.

Special Anniversary Luncheon, 50c

Will Be Served To-morrow From 11.30 to 2.30 in Our Victorian Restaurant, Fourth Floor

Our Delivery Service

475,000 Parcels—138,000 Miles During the Year 1929

Because of the continued expansion of this business, necessitating additions to our delivery equipment, two new Dodge cars have just been added to our already extensive fleet. The very latest features in delivery equipment are embodied in these cars—beauty and service being splendidly combined. More rapid deliveries within the city area daily and a more comprehensive service to the outlying districts will now be possible with this new equipment.

It may interest our many customers to know that during the year 1929 our delivery cars traveled 138,000 miles and delivered direct to the homes of our customers 475,000 parcels, not including those taken to the Express Offices or delivered through the Mail to out-of-town customers.

Celebrating Our

260th ANNIVERSARY

WALL GARDENING GROWS IN FAVOR

Offers Many Fascinating Possibilities on Uneven Ground

Wall gardening is growing in popularity on this coast and a few hints on the subject of this very delightful branch of the hobby may not be amiss at this time of year when one has time to do some constructive work in the garden.

There are many places where, the ground sloping very abruptly, a wall is an actual necessity to retain the soil at the end of a lawn that has been leveled, for instance, or to prevent the earth from sliding on to a drive or path that has been made through a bank—and it is better to have this feature somewhat ornamental if at all possible.

The best kind of a wall for growing plants is what is known as a "dry wall," that is a wall having its crevices filled with soil instead of mortar. Such a wall should be built with a "batter" or slope backwards, though with care and good workmanship this batter may be quite slight.

It is best to plant such a wall as the building proceeds as by so doing large plants may be used and the finished effect is attained almost at once. If, however, this cannot be done smaller plants must be inserted between the cracks and left to develop.

A great majority of plants usually found in rock gardens may be used in wall gardening, but those of trailing habit are to be preferred as they are most effective. Alyssum, Lobelia, Arabis, Arenaria Montana, Corydalis, Dianthus, Iberis, Gypsophila, repens, the small Hypericum, dwarf Phlox, silene, the larger sedums and veronica offer a good selection.

PLANTING WALL GARDEN

Near the top of the wall the Sun or Rock roses (Hefinthenums), and the rock geraniums may be established with telling effect. The planting should be done as in good rock gardening, enough plants being put together to give a bold effect and produce a striking mass of one color. In positions where there is very little soil such subjects as the dwarf sedums and the sempervivums should be used.

A little heavy soil should be worked up into a paste and a bit of it used to hold the plant in position. Failure to establish these plants in this way will seldom occur if it is done in the fall or early winter. Larkspur and Alpinas may be established in a wall in this way and will work its way along any chinks with charming effect. With the encouragement of the soil there is no better wall plant than campanula muralis.

PLANTING DIFFICULT WALL

If the wall is shady one may grow anemaria balcanica and this plant will form a carpet of green studded, in summer, with thousands of small white flowers, the effect of which is like a huge emerald set with small diamonds. Most of the campanula family will stand shade as will the woodruffs and, of course, all ferns.

It is sometimes happens that one becomes possessed of a wall which is not built for planting but which one wishes to clothe with flowering plants. One may go about this in several ways. If it is impossible to do anything in the way of making holes in the wall large enough to insert even small plants, a very fair job may be made at planting trailing plants at the top of the wall. These should be chosen with some care and if the wall is three feet or more high plants that trail a long way should be selected. For this purpose Saponaria, pink; Anemaria Montana, white; Alyssum rostratum, yellow, are excellent subjects. The trailing and climbing may also be used and will trail a long way with care.

Some of the trailing rock shrubs may be used to great advantage. These are the better shrubs for the purpose than Cotoneaster horizontalis, with its gay red berries in winter. The Rock or Sun roses are good and so are many of the trailing brassicas. It is often possible to pick out holes in an old wall in which earth may be introduced and plants established. This often is a laborious task, but some ingenuity but the reward is great and many a very ugly wall has been made to bloom by this method.

OTHER WALL PLANTS

Besides rock plants proper there are plants which seem to like to establish themselves in an old wall. Walls that have gone to decay in the Old Country are often quite covered with wall flowers, and this by the way, is how this flower got its name. The Virginia stock will be quite happy with very little soil in such a situation as will also Valerian. Many ordinary annual plants will grow in a wall, seed themselves from year to year and become almost weeds if not thinned out with a heavy hand.

A wall that is used for retaining a bank has a great advantage of a large mass of soil at its back into which anything that is planted has ample room to develop and it is not unusual for such a wall to be completely covered with plants so that the stone or brick with which the wall is built is not seen at all.

WATERING THE WALL

There is a little difficulty in getting plants established in a wall but this is overcome if careful attention to watering is given during the first year. After that no trouble will be experienced because the roots of the plants will soon find their way into the mass of soil behind and will grow quite as well as if planted in the open.

If one does not care to go to the trouble of looking after small plants in a wall a very good effect can be obtained by planting climbing roses of the rambling type either at the top of the wall, to trail down, or at its foot to climb up. Of course, roses planted in this way must be trained and pruned to suit the situation. Good roses for this purpose are Albic Barbery, yellow. Cant's Blush Rambler, apple blossom pink, Birdie Bly, pink, and almost any of the cluster roses will do well. Dorothy Perkins, which mildews so badly on walls on this coast, often does very well on a wall, provided the situation is open with a good circulation of air.

IVY IN THE WALL

Ivy may be used for covering a wall and while it is sombre it is evergreen and will grow in dense shade, and this should be remembered if the wall is in a shady position. There are many really beautiful varieties of ivy. The golden and silver kinds are uncommon and effective as is the little Irish ivy with very pointed leaves, which like every other form of gardening, wall gardening is largely a matter of personal taste and one must follow one's own best.

Personal and Societies

MANY ATTEND AT SCHOOL CONCERT

Over 500 Present at House-warming of Sir James Douglas Auditorium

Over 500 people attended the house-warming concert at the new Sir James Douglas School auditorium yesterday evening, when an excellent programme was staged under the auspices of the teaching staff and the Parent-Teacher Association in aid of the funds of the school. Principal W. H. Wilson presided.

Trustee W. C. Moreau, K.C., chairman of the building and grounds committee of the City School Board, gave an interesting history of the school, and described its present needs. He referred to the valuable part taken by both parents and teachers in the joint organization, and told how much voluntary service was welcomed by the board.

Students of the school who are entered for the Victoria Musical Festival repeated in part a programme that had been given earlier in the day at

the afternoon opening of the auditorium, and were heartily cheered for excellent choral and dancing numbers. The full programme follows:

Selections, the school orchestra; Scottish dances: Gladys Ackerman, Gwen Dewar, Jean March; recitation, "The House by the Side of the Road," Audrey Nixon; Russian dance, the senior; songs, "You Spotted Snake," "The Mountain and the Squirrel," "The Stormy Petrel," Jack Stokes; songs, "John Peel," "Now Once Again Our Hearts We Raise," the senior choir; Irish reel, the juniors; songs, "Anchored," Mr. Petrie; song, Kathleen Macintosh; Miss Dorothy Hartree; monologue, "The Student," W. C. Fyfe; club singing, Sgt. Major Frost; song, "One Morning Very Early," Mrs. W. H. Wilson; cornet solo, (soloist), Mr. George H. Green; duet, "A Regular Royal Queen," Mrs. W. H. Wilson and W. C. Fyfe.

The junior choir was trained by Miss Porter; the senior choir by Mr. Green; the Russian dancers by Miss Duncan and the Irish jig dancers by Miss Smith. Miss Farquhar capably accompanied throughout.

For Sgt. Major Frost's club-singing exhibition the room was in darkness and with the clubs illuminated, the number proved very spectacular.

Pupils' Recital—A recital of piano and vocal numbers will be given by the pupils of Olive Campbell, A.T.C.M., in the Hollywood Hall, Fort Bay, Saturday afternoon at 3.30 o'clock. Mrs. L. M. McCallan will assist and render a group of songs.

YOUR BABY and MINE

Mr. J. M. J. will be glad to answer all questions pertaining to babies and children. All stamps and self-addressed envelopes forwarded to this office will bring a personal reply.

IF BABY REFUSES BOTTLE, OFFER CUP!

All babies do not take kindly to bottle feeding, especially if they have been nursed for many months. Mothers need not fear their hair over this apparent dislike, but should be thankful that there are other ways equally as satisfactory as starting bottles late in the first year. Feeding by cup may be started as soon as baby can sit up. The amount in the cup should be small at first, until baby has learned to swallow fluid in mouthfuls instead of in drops. If the mother is patient and understanding, it is remarkable how quickly baby learns the trick.

Mrs. J. M. J. wants to know: "Will you print a formula for a baby of nine months? He has his soup and cereal and one night feeding. I started him on a bottle at three months but the doctor made me stop it, and now I am at my wit's end because he absolutely refuses milk by bottle. What can I add to his diet? How can I prepare his oatmeal? How much should he sleep each day? What shall I do when

he is restless at night and demands a night feeding? He always gets hungry at night."

This is a staggering bundle of questions but I'll do my best, Mrs. J. M. J. INTRODUCE ONE BOTTLE WEEKLY

The usual formula for a nine months' old nursing baby is four ounces of milk, four ounces of water and about two level teaspoonfuls of sugar. This amount is increased by about one tablespoon more of milk daily, and one tablespoon less of water. The number of bottles is increased weekly, so that when baby is on four bottles at the end of four weeks, the formula will be figured according to both age and weight. Our feeding leaflet gives this in detail and I suggest that you send for it, enclosing a self-addressed envelope.

The proper foods for the nine-month-old child are orange juice or tomato juice daily, cereal twice daily, vegetable soup and some sliced vegetable once daily and four cups or bottles of the milk formula. Weaning should be complete by ten months. Un-

diluted and unsweetened whole milk is in order at one year.

Outmeal is made this way for the baby: One-half cup of milk, one-half cup of water, one pinch of salt. Put directly on stove in top of double-boiler. When water and milk are boiling stir in two tablespoons of quick cooking oats. (Slow cooking oats take twice as long to cook but may be used if desired). When it has thickened put in bottom of double-boiler, cover and let cook for one hour. (This information is also in the feeding leaflet). WEANING TIME

A baby this age should sleep from seven to seven, or six to six at night and have one or two naps of about three hours in daytime. This makes an average of about fifteen hours of sleep daily.

The tendency to wake up and demand to be nursed is a habit that is found characteristically in the child who is ready to be weaned. Weaning right now will cause this habit to disappear. Even babies only seven months of age who begin this habit are saying as plainly as they can that their daytime feedings are no longer satisfying.

Royal Oak Flower Show—The annual spring flower show will be held at the Royal Oak Hall on Saturday, May 3, from 2.30 to 8 o'clock. Mayor Anson has kindly consented to open it at 3 o'clock.

Sketch at Equilmalt—At the Equilmalt United Church this evening at 8 o'clock the Ladies' Aid of the Belmont United Church will present the humorous play, "Afternoon Tea in Friendly Village."

WATCH WEEK

At Mitchell & Duncan's

Factory over-production has enabled us to secure a complete range of High-grade Watches which we are offering this week at greatly reduced prices. Do not miss this opportunity!

GENT'S WATCHES

Gent's Work Watches, 15-jewel movements, in Swiss-made case with dust cap over movement; regular \$18.00. Watch week.....\$13.50

Gent's Work or Sport Wrist Watches, cushion shape with seven on suede strap, chrome-nickel finish, fitted with fully guaranteed 15-jewel movements; regular \$12.00. Watch week.....\$8.50

Gent's Dress Watches, assorted styles, gold-filled cases fitted with 15-jewel movements; fancy or plain dials; regular \$18.00. Watch week.....\$13.50

Gent's Dress Watches, 15-jewel gold-filled cases in assorted designs, all fitted with 15-jewel movements; fully guaranteed; regular \$22.00. Watch week.....\$16.50

Gent's White Gold-filled Wrist Watches, white or green gold-filled cases, fitted with 15-jewel movements; regular \$18.00. Watch week.....\$13.50

LADIES' WATCHES

Ladies' Wrist Watches, assorted gold-filled cases, red or white, fitted with 15-jewel standard movements; guaranteed; regular \$18.00. Watch week.....\$13.50

Ladies' Rectangular-shaped Wrist Watches in white gold-filled cases with black ribbon bracelets, fitted with 15-jewel movements; guaranteed; regular \$12.00. Watch week.....\$8.50

Ladies' Rectangular-shaped Wrist Watches, white gold-filled cases, 15-jewel movements; guaranteed; regular \$22.00. Watch week.....\$16.50

Ladies' 14-k Solid Gold Rectangular-shaped Wrist Watches with 15 ruby jeweled movements; guaranteed; regular \$32.00. Watch week.....\$24.50

Ladies' White Gold-filled Rectangular-shaped Wrist Watches, 15-jewel movements, black ribbon bracelets, regular \$25.00. Watch week.....\$19.50

Ladies' Rectangular Wrist Watches, 15-jewel movements, white or red gold-filled cases; regular \$18.00. Watch week.....\$13.50

GIRLS' WATCHES

Girls' Wrist Watches with 15-jewel movements, in good quality Swiss-made cases; regular \$10.00. Watch week.....\$7.50

Ladies' Wrist Watch, 15-jewel movement, fully guaranteed. Fitted in latest style white gold case. Complete with fancy metal bracelet. Regular \$22.50. Watch week.....\$18.50

Nurses' Wrist Watch, with large over second hand, high grade yellow gold-filled case. Regular \$32.50. Watch week.....\$24.50

Ladies' Very High Grade Wrist Watch, extra heavy 14-k solid gold case. Regular \$123.00. Watch week.....\$95.50

Gent's 15-jewel Dress Watch, 17 ruby-jeweled movement. Fully guaranteed. Regular \$60.00. Watch week.....\$46.50

Gent's 15-jewel Dress Watch, very high-grade movement, beautifully hand-chased case. Regular \$28.50. Watch week.....\$22.50

BOYS' WATCHES

Reliable Wrist Watches for sports or general use, fitted with English sewn on suede strap; regular \$9.00. Watch week.....\$7.25

Boys' Wrist Watches, special white metal cases fitted with 15-jewel movements and good quality strap; regular \$10.00. Watch week.....\$8.25

ONLY A FEW MORE DAYS

JEWELERS

YOUR CHILDREN

By OLIVE ROBERTS BARTON

Do you say to your children: "Now don't tell Mrs. Smith where you got that dress, Mary. If she asks you about it, just say you don't know." "Be sure you tell Mr. Brown that you think Dad's gone on a business trip, Billy. He doesn't need to know that Dad took a day off to go to town with me." Because it won't be so very long until the chickens come home to roost. You'll be wondering how in the world you come to deserve having two such little liars for children.

One day I watched a little girl getting ready for a party. As her mother slipped on the sleek little cream alpaca coat and its small matching chapeau, kissed her child, handed her the ribbon-tied tissue-wrapped present, she asked suddenly, "What'll I say, mother?"

"Say? Why just 'How do you do, Mrs. Jones? I'm so glad to come to the party.'"

"No—but what'll I say? When I went to Kitty Lou's party I talked all wrong you said. The ladies asked me—"

"Oh, I know! You told all the family secrets, didn't you?"

"Well, what'll I say? I never know what to tell them because you got cross."

"I won't get cross this time, dear. Just say anything you like."

I wasn't there when the small miss returned, but I knew very well that if she'd been called down before for being natural and telling the truth, the chances were she'd be called down again. It set me to thinking about this business of older people with their easy conversational adjustments, and their feeling of justification in side-stepping facts, expecting young minds to use the same mature sophisticated judgment.

Children cannot distinguish between an absolute lie and that easy glossing over of the truth.

They don't know the meaning of evasion, they are not adroit at changing a subject without answering, or giving an ambiguous reply that tells nothing at all. We older people get very expert at these things. We know how to divert our audience, dressing up our replies and yet, according to our elastic consciences, sticking strictly to the truth.

We have no right to confuse children about the things they should or should not tell. A little advice on the subject of reticence is not a bad idea, but it must be approached carefully so that the child does not get the idea that misleading, others is paramount to truth.

What is the difference if Mrs. Smith knows that Mary's dress is made out of your old blue jersey. If Dad deliberately left his desk to go shopping, certainly Billy need not be chosen as attorney for the defence.

No, I shouldn't fill the children up with what they should or should not tell the neighbors. There's a good

chance that the neighbors know any way—at an rate, their mystification comes too high if Mary's and Billy's veracity is the price of it.

Tried it Yet?

THE WHOLE PACIFIC COAST IS SWITCHING TO THIS NEW HIGH COMPRESSION OIL THAT GIVES 200 EXTRA MILES OF LUBRICATION

SUPER quality at a fair price is making **MOTORITE** the most widely used motor oil in this community.

MOTORITE is, first of all, *super oily* or *extra slippery*. Thus it minimizes friction and guarantees smoother operation.

Next, it has the ability to cling tightly to metal. This enables it to form a perfect seal between piston and cylinder wall to resist the intense pressure developed by gas explosions above. *Maximum power* is the result.

And **MOTORITE** is equally efficient at *all working temperatures*. As the engine warms and the metal parts expand **MOTORITE** automatically adjusts its viscosity in just the proper ratio to assure 100% perfect lubrication.

A fourth advantage is its great capacity for giving up and carrying away heat. This feature assures cool bearings and is noticed particularly when traveling long distances at sustained high speeds.

No Hard Carbon

The small amount of carbon deposited by **MOTORITE** is *soft and fluffy*, much unlike the hard, gritty carbon, common to many oils.

And finally **MOTORITE** is strictly non-acid—no possibility of corroding the metal of your motor.

These six advantages guarantee you *longer service* from your oil. Now, with **MOTORITE** you can drain at 200 miles farther than you have been in the habit of doing.

Don't miss this extra 200 miles. Specify **MOTORITE** on your next refill.

UNION OIL COMPANY

English Women Defeat United States Team In International Golf

THE SPORTS MIRROR

FARMERS who, after their day's work is done, adjourn to the cow pasture to throw rusty pieces of hooped iron around a stake for a little recreation, will soon be doing their stuff before large crowds. Horsehoe pitching is rapidly becoming one of the recognized sports of Canada.

The Dominion of Canada Horsehoe Pitching Association has been making rapid strides recently, and it is hoped to put the sport at the top as one of Canada's leading summer recreations.

Many leagues have been formed and the schedules run late into the seasons, so that devotees of this barnyard game will have plenty of time for their pastime this summer. Local and county competitions under the control of the Dominion Association have been arranged.

Rules and regulations for the game have been drawn up and will cover the whole Dominion. But times have changed since the old barnyard days. No longer will it be a simple matter of throwing a shoe over an argument as to whose shoe is the closest. It is done by a tape measure these days. And no longer do they have to stop when the sun goes down. Plans are being made to install floodlights on some of the tossing grounds to provide for night play.

Nevertheless, horsehoe pitching is making the greatest strides of any game in the Dominion at the present time, it is claimed.

About 2,000 years ago the last Gallic gladiator spitted himself on the point of his rival's sword as his foot slipped in the Roman arena. And as he fell the populace turned their thumbs down in ghoulish delight at his defeat.

Less than twenty-five years ago the last matador plunged his sword into an enraged bull as the Spanish royalty, nobility and mob cheered wildly at the man's victory over the brute.

On Saturday night a crowd will gather to see two men in the finest condition battle in an endurance test to see which can weaken the other to a point where the opponent may be placed on the ground, rolled up and generally treated as a sack of potatoes.

When wrestling was introduced to Victoria sport fans a few months ago, many of the city's sportsmen wondered why the city's contestants enter the ring with sledge hammers and monkey wrenches to put a more effective finish to the bouts.

Now they have come to a point where the referees will no longer permit rabbit punches. The first thing the fans know, the flying tackle will also be banned, and there will be very little chance of either contestant being seriously hurt or maimed.

The gloriously free and easy, rough and tumble methods are being crimped, and yet it is surprising that so few of the wrestlers come out of their bouts the worse for wear.

Joe McGowan, who now how he could have won the last world series in easy fashion. In the ninth inning of that last game, when Bing Miller was at bat and the winning run was on base, Joe McGowan, who had called Mr. Malone right out of the box, borrowed a left-hander from John McGraw or somebody and sent him in. And Bing Miller would have rolled out instead of driving in the run that settled the series.

Bing Miller says so himself. "These cunning, cunning crooked arms always get me rattled," says Ring. "I'm about the rottenest right-handed batter against southpaws in this league."

The word "cunningthumping" is one of Bing's very own words. He uses it to apply to the delivery of pitchers who send up a ball that looks like a basketball as it crosses the plate, but is hard to hit.

"You see that apple drifting up there like a hot air balloon," says Miller, "and you step up to knock it out of the park, but you don't. You get a nifty line drive to the catcher or roll an easy one down to an infielder."

"When I broke in with Washington (that was in 1921), they used to send me in to pinch hit against left-handed pitchers on the theory that a southpaw ought to be easy for right-handers. And I didn't hit the size of my hat. Finally they asked waivers on me."

Clyde Milne told me a lot of the clubs waived on me because I couldn't hit those crooked arms.

"Neither could you," I told him. "If you weren't in there every day."

"They gave me one more shot at it—put me in every day and never took me out. But I still can't hit those cunningthumping guys."

That ought to be valuable information for whatever team meets the Athletics in the next world series.

Burnside Bowlers To Hold Memorial Match Saturday

Burnside Bowling Club on Saturday will inaugurate a memorial game, which it is anticipated will become an annual feature of the club's programme.

All members and friends of the club are invited to put their names in the draw. The last six ends of the game will be sacrificed to "Memorial Memory" which will be conducted by the officers of the club in Hampton Hall at 4 o'clock.

The executive committee of the club will hold a special meeting at 4:30 o'clock to receive applications for membership and discuss arrangements for entering the Greater Victoria Lawn Bowling League.

Budding Sandows To Perform Strong Man Act In Gym Display

Lee and Company Promise Real Feats of Strength at Annual High School Athletic Gathering; Bending Spikes With Hands and Iron Bars With Teeth Are Stunts; Boys and Girls Train Hard for Display on May 16 and 17.

Victoria High School will hold its annual gymnasium display on May 16 and 17 and according to reports from W. A. Roper, physical instructor at the school, this year's event will be a bigger success than any held in the past. The programme will be more varied and is to be featured by a strong man exhibition by two school youths who parade under the name of Lee and Company.

"Young" Stribling To Meet Scott In London June 10

London, May 1.—W. L. "Young" Stribling, United States heavyweight, was matched yesterday to box Phil Scott, English champion, in London, June 16.

GRIFFITHS-VON PORAT BOUT LOOMS

Tuffy Ready to Step Ahead After His Revenge on Jack Gagnon

Over 20,500 Fans See Heavyweight Contender Decision Sailor

Chicago, May 1.—Tuffy Griffiths, of Sioux City, Iowa, to-day was back on the list of contenders for the world heavyweight boxing championship, the strain of a technical knockout defeat by Jack Gagnon removed from his record by a ten-round decision victory over the Boston sailor yesterday evening.

Before 20,500 spectators, most of whom went to the Chicago Stadium hoping to learn that Gagnon's stunning victory over Griffiths at Philadelphia early last month was a mistake, one tough one outboxed Gagnon.

The right hand that sent Griffiths crashing to the canvas in Philadelphia did little damage, although Gagnon kept it busy all evening. Griffiths' long left was in great working order and it kept Gagnon off balance. The sailor never stopped trying and the right was swishing over Griffiths' head or landing high just as busily at the bell as at the start.

Gagnon failed in his effort to convince that he is among the best in his division, but the job was anything but a financial failure for him. The fight drew a gate of \$75,684, with Gagnon receiving thirty per cent.

NATURAL BOUT Griffiths' triumph probably will lead to a great "natural" for the stadium next month—a Griffiths-Otto Von Porat bout. Von Porat had agreed to meet the winner and Griffiths is expected to sign up soon.

Gagnon had a pound and half weight advantage, scaling 166½, when they weighed in yesterday afternoon. The experts figured Griffiths won six of the rounds with three to Gagnon and one even.

Griffiths' victory erased the most serious blot on his record since he became a heavyweight. After finding that he could take Gagnon's wallop and remain off the floor, he started in the second round as if he intended to put Gagnon on the resin for keeps. His most effective punch was a left to the head and body with a jolting right cross to follow up. He pulled up points with his left hand stabs to the chin which kept Gagnon off balance.

Colonel Bogey To Meet General Par

Knight of the Uplands Fearless Foursome Fric Club, an aggregation of clubs, near-dubs and super-dubs at the Uplands Golf Club will hold their first nine-hole handicap tournament at the course next Tuesday evening at 5:30 o'clock, it was announced by F. G. Dillworth, the Knight Commander.

The regular monthly meeting will be held for some peculiar style or alibi, the result being the following schedule of play:

5:30 p.m.—Col. Bogey, Sir Hook, Sir Cross Wind and Sir Rough.

5:35 p.m.—Sir Do Do, Sir Flagstick, Sir Cent-a-hole and Sir Water Box.

5:40 p.m.—Sir Igorote, Sir Toe Dancer, General Par and Sir Foursome.

5:45 p.m.—Duke Scorekeeper, Sir Over Swing, Sir Short Stroke and Sir Tough.

5:50 p.m.—Sir Divot, Sir Threesome, Sir Loose Grip and Sir Bystyle.

5:55 p.m.—Sir Casual Water, Sir Fairway, Sir Best Ball and Sir Eagle.

6:00 p.m.—Sir Double Dubs, Sir Alibi, Sir Elbow and Sir Mashie-biblic.

6:05 p.m.—Duke Starter, Sir Bunker, Sir Hazard and Sir Stance.

6:10 p.m.—Sir Spoolie, Sir Slow Back, Sir Golf Lie and Duke Pro.

6:15 p.m.—Sir Birdie and Sir Dornie.

The regular monthly meeting will be held after the game, followed by an entertainment and supper.

Small, inside left of the champions, was the white-haired boy yesterday. Next combination work by the Bay forward line put him in a position to score three counters early in the first half of the game. Don Newell, outside right, chalked up the fourth and then Small completed the job with another score before the halfway mark, the count being 5-0 at the rest. Play throughout the first half was a great contest, confined to the midfield and of the field. The United were playing a defensive game owing to the fact that they only fielded ten men.

The United had the wind at their backs in the second half and endeavored to make the most of it, but an outright defence met their efforts. Davis scored their lone counter on a

ROSE SOCIETY SHOW JUNE 21

C. J. Prior Chosen President
at Annual Meeting of Oak
Bay Flower Growers

The annual show of the Oak Bay Rose Society has been provisionally set for June 21, at the Crystal Garden. The date was selected yesterday evening at the annual meeting held at the Oak Bay Municipal Hall with a large attendance.

C. J. Prior was elected president, succeeding Dr. W. P. Walker, who has been president for two years. Other officers for 1930 will be: Pyle Smith, vice-president; David Reid, secretary; E. Stenham, treasurer; committee: Judge P. S. Zampman, M. R. Jamieson, W. F. Salisbury, H. R. Beaven, Dr. W. P. Walker and Capt. F. G. Dexter.

Reports presented showed the society to be prospering, the membership being nearly one hundred. Tribute was paid to the late Gordon Downes, an active exhibitor and a member of the committee of the Rose Society for several years.

Mr. Stenham stated that all varieties of roses now being grown in England are being produced on Vancouver Island. He had last year visited the National Rose Show in London, England, and had found no exhibits superior to blooms grown in Oak Bay.

New competitions for school children will be organized by the Rose Society, including tables decorated with roses. It was suggested that the society substitute decorated mantelpieces for the customary decorated tables and decorations, which have become highly popular features of the annual exhibition.

VISTAS OF BEAUTY IMPORTANT FACTOR IN EVERY GARDEN

Choice Glimpses Should Be
One of Chief Objectives

It is necessary to have some high objects in the garden in order to create those delightful glimpses loosely called "vistas." Walls, trellises, fences, pillars, climbing plants, lofty shrubs, can give height, but trees are better for the purpose, because they achieve results long before the shrubs can, are broader than the pillar-climbers, and more permanent, whereas latter, herbaceous, or annual plants, disappear in the fall.

An example of a garden vista or peep, is an arched opening in a tall yew hedge, but the yew hedge must be many years old to be of any use for this purpose. The common laurel is the quickest-growing evergreen that becomes tall enough for the purpose and answers well, though if it is to be planted for the sake of creating a vista, it is as well not to continue the hedge any further than necessary but rather to complete with some other shrub or shrubs, so as to avoid monotony.

Let us suppose that a straight path runs across a lawn. Let a six-foot border be made on either side of the path, leaving a one-foot turf edge. Plant a pink-flowered hawthorn and a bronze-leaved prunus facing each other at the corners of the border nearest the lawn. Next to these, six feet further on, plant a laburnum and a sycamore midway in each border. Next to these another six feet along plant a flowering almond and a mountain ash, nearer to the edge of the border on the path side. The result of this planting will be a tunnel of foliage and blossom, and a very beautiful vista down the walk. Before many years the last two trees will meet and will have to be cut back a good deal on the path side, but the effect will be charming.

USE OF SHRUBS

In a very small garden the effect may be obtained with smaller-growing subjects, such as elms, tamarisks, broom, rhododendrons, spiraeas, deutzias, hydrangeas and many other plants.

A glade of this kind may be made with flowering crab, cherries, or with fruit trees which would be useful as well as ornamental.

Once the gardener adopts the vista aim his own ideas will work out many ways of getting these garden peeps and he will find much material for his ingenuity.

MASKING UGLINESS

The unsightliness of an ugly building may be cured by letting a wide arch spring from one side of it and converge on a path in a slanting direction. Then add two more arches from the side of the building several feet apart and cover them with any suitable climbing plants. The border against the building should be planted with shrubs that will completely block it out.

An arch over a garden bench with another three feet in front of it will make a vista of a garden as seen from the bench if these are planted with climbing roses or other suitable subjects. At very fine combinations of arches of this kind is to plant clematis and roses together. You may plant them in the same hole and they will agree perfectly.

Another kind of glade may be made by using annual climbers on chicken wire. The wire should be painted green, however. Be careful, runners, canary creepers, nasturtiums and other climbing annuals can be used and will make a very good temporary glade for those who do not care to make a permanent planting.

PEEP INTO THE GARDEN
In looking over one's garden one should see if they are overlooked from the road and if so whether one wants to obstruct the view of the passerby or whether one wishes to give the benefit of a peep into the garden. If the latter is the object the peep from the road may be made more charming by using the methods already described. In the same way the next door neighbors may be considered for if our hearts are in the right place we shall want to make their view as charming as we can.

It is strange that people plant to the same old trees and shrubs year after year instead of trying to get more common varieties. Here are a few seldom seen but which are all charming in the garden: *Populus pendula* (weeping poplar), *Pyrus aucuparia* (golden pippin), *Prunella montana* (yellow-bellied mountain ash), *Corylus pendula* (weeping hazel), *Sambucus racemosa serratifolia* (scarlet-fruited, cut-leaved elder), *Philadelphus 'Lemonchiffon'* (lemon-colored, with bush flowers). Even in a very small garden some

one or two of these less common trees or shrubs could find a place with much advantage to the general appearance of the grounds.

PRESERVING TREES

In many coast gardens it is possible to get beautiful vistas by using the trees that are already growing. It is often simply a matter of cutting out one or two trees so as to allow the remaining ones to form a glade or a screen which will give a garden peep that is perfect. Sometimes it will be necessary to plant something in conjunction with what is already on the ground to round out the idea and thus attain the object. If one will take the trouble to go over one's ground with this idea in view one will often be able to discover how the existing features may be used to the best advantage, and always remember that the tree that is already growing is years ahead of anything you can plant. Don't make the

common mistake of cutting everything down and starting afresh.

In one of the coast cities there is a terrible example of this unwise policy. A beautiful place of about two acres was bought by a very rich man, who had the whole area cleared, a \$40,000 house built, an Italian garden with fountain and lily tank constructed and thousands of dollars worth of nursery stock planted. The result is a wilderness of little trees and shrubs which will take a dozen years to make an effect. In the meantime there is no shade and no design—just a mess. Had some of the natural growth been left there would have been a garden. As it is there is nothing but a wilderness and no amount of money can remedy the error until the planted nursery stock has time to grow.

One may easily spend some time with a great deal of profit at this time of year by carefully looking over one's garden with a view to vista possibilities.

Concert at St. Barnabas Hall

A very successful and well-attended concert was presented at St. Barnabas Hall last evening by the choir of the church. Pianoforte trios by Clara Frenner, Verena Dyer and Dorothy Clark were very well played; Bernard Howard, a new comer to Victoria, presented four violin numbers, calling for full command of the instrument and executed them with great technical skill and fine artistic feeling, being splendidly supported by his accompanist, Mrs. Helen M. Simpson. Harold Groves carried the audience away in his humorous interludes. Mrs. Rena Hunt sang "Who'll Buy My Lavender" and "Absent," in splendid voice and with much feeling. A party from the Victoria Male Choir contributed much-appreciated choruses. Mr. Llewellyn adding a couple of fine solos. By kindness of Mrs. Wilfrid Ord, pupils of the Victoria School of Expression gave material assistance to the success of the programme. Barbara Clow and Billy McPhail contributed recitations, and a most amusing little sketch, "The Gauseage," was well staged by Opal Abercrombie, Billy McPhail and R. Walker. A fine climax to the programme came with the sketch, "No Smoking Allowed," cleverly concocted for the occasion by the Rev. N. E. Smith. It was a characteristic episode in the home of an out-of-work London plumber and some of his "barges" friends, and all members of the cast sustained their parts admirably, to the delight of the audience. The players were: Mrs. Monty Gonnell, Rev. N. E. Smith, Messrs. T. Timmerman, Monty Gonnell and Wright.

Will Repeat Play At Marigold Hall

The Young People's Society of the Emmanuel Baptist Church have consented to repeat the play, "Aunt Susan's Visit" at the Marigold Hall tomorrow night. The play, which is to be given under the auspices of the MacKenzie Avenue School, is very humorous and entertaining in that the old-fashioned and eccentric Aunt Susan visits her nephew, John Thomas, residing in the city.

An informal programme of songs, recitations and community singing is offered in the last act of the play. The MacKenzie Avenue School choir will sing their festival selections, "The Cuckoo" and "The Corn Song," and it is hoped by the staff of the school that parents in particular will attend.

**Have You
a Child
born in 1918?**
(A child whose 12th birthday
falls in 1930?)

**Then Ask your Kodak Dealer for this Special Anniversary Gift
Camera and Roll of Kodak Film!... PAY NOTHING... BUY NOTHING**

Typical picture, actual size, 3 1/4 x 3 1/4 inches,
taken with the Anniversary Camera
and Kodak Film.

PARENTS... CHILDREN...

**CAMERAS to be distributed FREE
to 50,000 Canadian Children**

Beginning May 1, 1930, in celebration of the 50th Anniversary of Kodak...
with the compliments of George Eastman, founder of the Kodak Organization

HAVE you a child whose TWELFTH birthday falls in any month of the calendar year 1930?

During the month of May, 50,000 cameras as illustrated—each complete with a roll of Kodak Film—are to be distributed free among Canadian children whose 12th birthdays occur any time this year.

It is a nation-wide gift, in celebration of the 50th Anniversary of Kodak, presented with the compliments of George Eastman, creator of Kodak and founder of the Kodak organization.

If you have a child reaching the age of twelve this year, simply take him or her to an authorized Kodak dealer's after May 1, 1930, and ask for the camera. You pay nothing, you buy nothing. This is a gift.

There are no reservations to the gift, except that no cameras will be given before May 1 or after May 31, 1930, and none after the original supply of 50,000 is exhausted. To be sure of getting one, act early.

Why the Gift is Made
Editors and educators say this is one of the most

**No Parent With A Child Eligible
Should Fail to Accept**

No parent with a child eligible should fail to accept for his child the Kodak Anniversary Gift Camera and Film.

For, as a factor in developing observation, amateur picture-making is probably second to no other as an educational adjunct.

unusual public gifts in the history of industry. For it is openly made to benefit both the giver and the children who receive it.

Many of these authorities hold that the acceptance of the Kodak Anniversary Gift Camera and Kodak Film is a duty every parent owes his child.

For, as a factor in developing character, observation, appreciation of beauty and a depth of human understanding, one points out, amateur picture-making is probably second to no other factor as an educational adjunct.

It brings a child in touch, says another, with every phase of life and nature, and implants a clean interest in the formative mind, during the dangerously impressionable years, when a wholesome pastime is most needed to safeguard the future of the growing child.

**This Gift is Made With Two Ends
in View:**

From a sentimental standpoint: As a token of appreciation to the grandparents and parents who for 50 years have played so important a part in the development of amateur picture-taking, and in the development of the Kodak Company. To place in the hands of their children and grandchildren an admittedly important educational and character-building force.

From a business standpoint: As a means of interesting thousands more children in picture-taking. And to raise amateur photography, among the coming generation, to even greater

heights than its present remarkable peak. For as amateur photography increases in popularity, the use of Kodak products will naturally increase with it.

At Your Kodak Dealer's Now

The Anniversary Cameras are at authorized Kodak dealers' everywhere now—ready for distribution.

Take your child to any of these stores. Ask for the camera. No red tape, no delay, no cost. Accepting the gift for your child places you under absolutely no obligation whatsoever.

The gift-giving period will extend into the month of May as long as the supply of 50,000 cameras holds out. To avoid disappointment, go early. Be sure of getting one for your child.

NOTE: In appreciation of their co-operation and loyalty through the years, this special Gift Camera will be distributed through stores of the nation-wide network of active authorized Kodak dealers. Authorized Kodak dealers are located everywhere. Step up to the Kodak counter with your child and ask for the Gift Camera.

A Gift of 50,000 Cameras

50,000 cameras—each complete with one roll of Kodak Film—are offered absolutely WITHOUT COST to Canadian children whose twelfth birthdays fall in any month of 1930.

The gift is from Canadian Kodak Co., Limited, with the compliments of George Eastman, creator of Kodak and founder of the Kodak organization, in commemoration of Kodak's 50th Anniversary.

NOTE: In appreciation of their co-operation and loyalty through the years, the special Gift Camera will be distributed through stores of the nation-wide network of active, authorized Kodak dealers. Authorized Kodak dealers are located everywhere.

Gift Cameras will be distributed May 1, 1930, by authorized Kodak dealers, and continued until the supply of 50,000 is exhausted. None after May 31, 1930.

To get a camera, simply take your child to an authorized Kodak dealer. Pay nothing. Child must be accompanied by either parent or guardian.

ADVERTISE IN THE TIMES

NEWS IN BRIEF

A president, vice-president and treasurer will be elected at the meeting of the directors of the Victoria Chamber of Commerce to-morrow.

Pat McDonald, charged with being intoxicated in a public place, was sentenced to twenty days' imprisonment in the City Police Court this morning.

To-night at 8 o'clock at the Conservative Hall, Campbell Block, Prof. Molloy will give a lecture-lesson on "Love, the Master Passion," followed by character readings of volunteers from the audience.

Further improvement was shown in the condition of Evelyn Clark, who was taken to the Jubilee Hospital Tuesday with burns about her face, arms and chest. A report to that effect was made by Dr. A. C. Sinclair.

Slight damage was done by a bush fire on Kenneth Street, near Glenford Avenue, yesterday at 3.40 o'clock. The Sanich fire-fighting force rushed to the scene of the conflagration and had it under control in a short time.

John Farrell, arraigned in the City Police Court this morning on a charge of begging, was dismissed with a warning by Magistrate Jay. The accused stated he had been ill for a considerable time and had been unable to secure employment.

An action on two promissory notes for \$2,077 and interest is claimed, was set for hearing in the Supreme Court to-day in a suit by John Ariston, of this city, against J. D. Campbell of Vancouver. C. H. O'Halloran appears for the plaintiff and J. D. McPhie for the defendant.

To-night a grand ball will be held at the New Shrine Auditorium under the auspices of the Bus Drivers' and Chauffeurs' Association. It is expected that there will be a large attendance. All members are requested to be in attendance at 9 o'clock sharp with their many friends.

Next Wednesday evening at 8 o'clock, Victoria Aerle No. 12, Fraternal Order of Eagles, will hold a meeting for the election of officers. Arrangements for the meeting, which are in the hands of Past President Charles Jasper, call for a smoking concert to precede the business session.

Discovery of the coddling moth in shipment of apples recently received from New Zealand led to the condemnation of the entire consignment for distribution in British Columbia. The fruit will be forwarded to the prairies, where the fruit against this pest is less severe and where the extreme winters prevent it from thriving.

Here on a mission to clear up certain charges in connection with lands and other business, S. K. Fitzpatrick and J. H. Mitchell of Oliver, B.C., interviewed Hon. P. P. Burden, Minister of Lands, and Hon. W. A. McKenzie, Minister of Mines and member for the district yesterday. It was understood that their conference with the Ministers was satisfactory.

Ring No. 18 of the International Brotherhood of Magicians met Monday night at the residence of Carl Hemen, Sumas Street. After a very successful meeting and transaction of business, followed by a social gathering, the members retired to the dining-room for supper. A hearty vote of thanks was voted Mrs. Hemen, the mother of Bro. Carl Hemen.

The following donations were received by F. Landsberg, local treasurer, Save the Children and Near East Relief Funds for the month of April, 1930: A Friend, \$5; "E", \$1; A. Way, \$2; E. P. Burden, \$10; E. G. Curran, \$5; Miss Mackenzie, \$10; \$4.35; Mr. Newton Sunday School, \$10; Anon., \$2. Total donations, \$30.35. Further donations will be gratefully acknowledged by Mr. Landsberg at 737 Fort Street.

A total of \$1,033,475 was the value of new construction placed under way in Victoria city for the first four months of the current year. It was stated to-day by L. J. Bekman, assistant city building inspector, April permits issued for the four-month period were 287 in number. The figures do not include the remodeling of the Canadian National Railway ferry docks, estimated to cost in the neighborhood of \$100,000.

As a result of the visit to Victoria of New Zealand delegates to the Empire Press Conference, Vancouver Island will be well advertised in the Antipodes. Frank Glolma of the Publicity Bureau reports. J. W. Berry, secretary of the New Zealand Newspaper Proprietors' Association, secured a number of pictures and articles which will be published in New Zealand papers. He also secured information for a series of lectures which he will give on his return.

Dancers using the Empress Hotel ballroom in the future will have a canopy. Work has been commenced in remodeling the ballroom and the contractors, Carter-Hall-Aldinger Company Limited are at present engaged in covering the roof with gypsum three inches in thickness. This will be covered with boards and the whole sheathed in glistening copper. The former glass roof has suffered considerably during the last few years and it was deemed advisable to cover the ballroom with something more durable.

An article on Victoria will soon be published in the widely circulated British Medical Journal, which reaches every part of the English-speaking world. Frank Glolma, publicity writer for the Victoria and Island Publicity Bureau, is advised. An article was recently prepared by the Bureau under the auspices of the Victoria Medical Association, to publish in the Manitoba Medical Journal in connection with the convention of doctors here, September 3, 4 and 5. A request has been made to the Bureau for permission to publish the same article in the British Medical Journal.

WHEAT NEAR DOLLAR MARK AT CHICAGO

Chicago, May 1.—Wheat prices here sluggish for weeks, descended to-day to another low level for the season for May delivery and were within an ace of the dollar line.

The bottom was reached at \$1.00, a bushel for May wheat, delivery of which began to-day. The finish, however, was unchanged to 1/4 cent lower, May closing at \$1.01 1/2.

RAILWAY PUTS VAST SUMS IN CIRCULATION

William Bell Tells Rotary Club of Railroads' Purchases

Supplies Costing \$763,280 Bought by Local Office of C.P.R.

Through its Victoria purchasing office the Canadian Pacific Railway last week bought supplies costing \$763,280, the Rotary Club was this afternoon informed by Rotarian W. Bell, in the course of a classification talk at the weekly luncheon at the Empress Hotel. Mr. Bell stated that the figures quoted did not include all the supplies used locally, as large orders had been placed through other purchasing offices.

Mr. Bell stated that in 1928 the Canadian Pacific Railway had purchased local supplies for \$89,000,000. Taxes paid in that year amounted to over \$8,000,000 and over \$12,000,000 had been distributed in wages. The payments were equivalent to \$416.25 per minute throughout the year.

Mr. Bell stated that special efforts were being made to develop local sources of supply by allowing price concessions. While contracting firms incurred no bad debts his files contained at least one application for the railway's business.

Illustrating the co-operation experienced from contracting firms, Mr. Bell stated that when the Cutback bridge on the Fraser River washed out last year, thirteen cars of big timbers were en route within one day, although only four miles were operating.

SKILLFUL CORNETISTS

In addition to the usual fine musical programs by the Rotary orchestra the members were entertained with brilliant cornet numbers by the Misses Macleod and Ruby Hodgkins, members of the Girls' Brass Band. R. R. Webb called attention to the initial concert to be given by the band next Monday at the Crystal Hotel. Under the patronage of Chief Justice J. A. Macdonald, the Administrator for British Columbia.

NOMINATING COMMITTEE

Directors selected the following members, at least one representative to the committee which will bring in nominations for office: W. A. Jameson, H. Brown, A. E. Mallett, W. Sheret, H. P. Burden, J. H. Hughes, F. J. Sehl and R. T. Murphy.

Alderman James Adam called upon the club to send a strong delegation to the President, Carmichael, to the Rotary district convention at Spokane shortly.

WORLD LISTENS TO MARCONI ON YACHT AT SEA

Radio conversations between Marconi's yacht, at sea off Naples, with David Sarnoff and others in New York, with an audience of 100,000, a remarkable radio achievement was broadcast over the National Broadcasting chain.

The broadcast commenced at 1 o'clock and continued until 2 o'clock, the voices being notable for the realism and clarity of the transmission. Senator Marconi replied to questions from New York immediately, giving information as to the position of his vessel, the equipment used, the length of aerial and a host of technical details.

The power input was stated by Senator Marconi to have been four kilowatts, but with an antenna of possibly 750 watts. The transatlantic transmission was on twenty-five metres. In addition to Senator Marconi and Mr. Sarnoff, the world audience heard the voices of Marchioness Marconi and many other persons who shared the test.

OBITUARY

After a lingering illness, Mrs. Margaret Thompson, wife of F. J. Thompson, well-known grocer of 451 Cook Street, passed away this morning at the family residence at 451 Cook Street. The late Mrs. Thompson was born in England and had been a resident of Victoria for seventeen years. She is survived by her husband, one son and one daughter. The remains are resting at the Thompson and Paterly Funeral Chapel, from where the funeral will be held on Saturday afternoon at 2 o'clock, proceeding to Christ Church Cathedral for services at 2.45 o'clock. Interment will be in Ross Bay Cemetery.

The funeral of the late Angus Gillis will take place on Saturday morning at 10 o'clock from the McCall Bros' Funeral Home. Rev. George Pringle will conduct the service, after which interment will be in Ross Bay Cemetery.

The funeral of Charles Henry Slade will take place on Friday afternoon at 2.30 o'clock from McCall Bros' Funeral Home. Rev. George Pringle will conduct the service, after which interment will be in Ross Bay Cemetery.

The funeral of the late George Clinton Pollard will be held to-morrow afternoon at 2 o'clock from the Sands Funeral Chapel. Rev. Thomas Key will officiate and the remains will be laid to rest in Ross Bay Cemetery.

The funeral of John George Brewer, who passed away in Seattle on April 15, was held yesterday afternoon from the Sands Funeral Chapel. Relatives and many friends were in attendance, and the casket was covered with beautiful flowers. E. Myers presided at the organ and rendered "O Gentle Presence." The pallbearers were R. White, J. F. Hough, D. Clark, J. Johnson, J. R. Benson and J. E. Myers. Interment was in Ross Bay Cemetery.

The funeral of Rupert Phipps took place yesterday afternoon at 2 o'clock from Thompson & Paterly's Funeral Home. Rev. A. deB. Owen officiating. Many friends were present and the casket was covered with beautiful floral tributes. The hymns, "Jesus, Lover of My Soul" and "Lead, Kindly Light," were sung. Lawton Partridge presided at the organ. The pallbearers were Robert Day, John Day, J. Sidney Fry, Joseph Day, William

AVIATOR MAY WINS TROPHY

Ottawa, May 1.—W. E. "Wop" May, intrepid flier of Edmonton, Alta., is 1929 winner of the McKee Trophy, awarded annually to the pilot who renders the most meritorious service to the advancement of aviation in Canada. The trophy, which that Hon. J. L. Ralston, Minister of National Defence, as trustee of the trophy had approved of its award to May was made here to-day.

B.C. EXHIBITS AT WORLD FAIR

Worthy Representation Is Sought For Regina in 1932

The British Columbia provincial committee has instituted an effective campaign looking towards a worthy representation of that province at the 1932 World's Grain Show. The British Columbia Government has made provision for the necessary expenses of a small working committee under the chairmanship of J. B. Munroe, Provincial Deputy Minister of Agriculture. A list of prospective exhibitors is being compiled and these will be communicated with. A list of the varieties and kind of seed adaptable to the various districts is being prepared for the guidance of exhibitors. Plans are in preparation also for the publication of articles, radio talks, advertisements and public meetings so that all matters pertaining to this coming event will be well known to the people of all parts of the province. "Hints for exhibitors" will keep growers informed upon seed, crops, threshing, cleaning, etc. British Columbia is much interested in the opening of the fair and will make an effort to be well represented in this section.

COLISEUM WILL REOPEN MONDAY

British Pictures Will Be Given Preference; High Class Talking Machine Installed

With a first-run picture, "The Cocking Year," produced over a new talking machine, several late British Government Street, will reopen its doors to the public on Monday next under the management of H. J. Allen, well-known theatre manager of Canada, who formerly owned a chain of theatres in the western provinces. Mr. Allen is now associated with W. P. Devese, who now operates the Capitol and Royal Victoria Theatres in Victoria, and the Strand, Beacon and Rex Theatres in Vancouver.

The Coliseum is now in the hands of kalamintins and decorators, and, at a cost of \$15,000, is being given a thorough overhaul before the formal opening on Monday. Talking experts are at present working at the theatre and are installing Beltona equipment, which is considered the latest word in talking equipment and permits the use of both films and discs. The new machines were expected to be ready for test this evening.

"It is our intention to show the finest films available," Mr. Allen said to-day. "If given the support we expect, Victorians will have an opportunity of seeing the best films offered at a low price."

"British pictures of particular merit will be shown at the Coliseum Theatre," continued Mr. Allen. "We have connections with several late British picture producers, and we have been informed that several outstanding pictures are now in the course of production and will be available shortly. It is our intention to show as many British pictures, of the better class, as we can obtain."

"During the last year or so there has been a constant demand for the second showing of outstanding pictures. At the present time this is more keenly felt, but with the opening of the Coliseum Theatre we will be able to show these pictures for three days, or longer, if necessary. This depends entirely upon the support we receive from Victorians."

GRAPHIC TALES OF YUKON TOLD

Rev. G. C. F. Pringle Gives Anecdotes on Experiences There Before Club

Graphic tales of his early days in "the land of the midnight sun" were told to members of the North Spanish Service Club in the North Sanich Hall yesterday evening by Rev. G. C. F. Pringle, pioneer sky pilot there.

With many humorous anecdotes, told in a free, informal way, the speaker told stories of the lives of some of that land's well-known characters. He sketched in some detail the majestic scenery of the country speaking of its mountains, rivers and other natural beauties. Game and fish plentifully made it a veritable sportsman's paradise, he added.

Alex. McCloy, auctioneer of this city, related stories of many colorful incidents encountered in his trade and had the audience laughing wholeheartedly at many of his tales.

MUSICAL PROGRAMME

Songs were sung by Miss Charlesbois, Francis Arthur Partridge, Miss Viola Johnston, accompanied at the piano by Cecil Heaton. Oscar McComb played violin selections, and Bill Hendricks, Ukrainian fiddler, and Ted, Rishbi, played accordion. The programme was an exhibition of a softball game between Fimley & Ritchie's of Victoria and the Victoria team, and the star team of the North Sanich Service Club. The Service Club won.

A number of the young ladies of the club in pretty costumes, assisted in serving supper and the hall looked gay with streamers of colored papers and evergreen. Dancing brought the enjoyable evening to a close.

Reid and W. Petherbridge. The remains were laid to rest in the Ross Bay Cemetery.

HOTEL HEAD HERE TO-DAY

H. F. Matthews, Manager of C.P.R. Western Hotels, Makes Brief Stay in City

Making Inspection of Mountain Hotels Prior to Opening For Season

Making a tour of the company's hotel system in the west preliminary to the opening for the summer season of the mountain resorts, H. F. Matthews, general manager of the Canadian Pacific Railway western hotels, reached Victoria this morning from Winnipeg with his secretary, L. S. Williams.

"Just came over to see the flowers and enjoy the sunshine," exclaimed Mr. Matthews at the Empress Hotel to-day.

SAW POWER PLANT

In company with J. A. Angus, C.P.R. construction engineer who also reached the city to-day from Vancouver, the head of the western hotel system went over the new power plant being built on Douglas Street and expressed himself as well satisfied with the progress made on the contract.

He was interested in the concrete underground tunnel which has just been completed and will give direct access from the power station and steam laundry to the hotel grounds.

The hotel gardens, bathed in color and fragrance, particularly attracted the notice of the visitors.

The green lawns and flower beds are at their loveliest at this season.

BANFF OPENS MAY 15

Mr. Matthews stated that the Banff Springs Hotel, chief of the company's mountain chain, will be opened for the season on May 15, while the Lake Louise Chateau will open its doors to the travelling public on June 1. All is in readiness for a big tourist season in the mountains.

On his way back to Winnipeg, Mr. Matthews will stop at the Banff Springs Hotel for the opening. He plans to leave Victoria to-night for the east.

MAN SQUEEZED UNDER CARRIAGE AT LOCAL MILL

Suffering from injuries to his chest, sustained when he was squeezed under a log carriage in the Cameron Lumber Company mill shortly after noon to-day, Frederick Purvis is lying in the St. Joseph's Hospital under the care of Dr. Gordon Kenning this afternoon.

The accident occurred when another man working on the same carriage moved it and crushed Purvis, who was working underneath.

Wallace Courtney To Manage Airways Transportation Here

H. B. Olson, president of the Alaska-Hawaiian Airways of British Columbia Limited, to-day announced the appointment of Wallace Courtney as Victoria manager in charge of passenger transportation. He is the son of George L. Courtney, former C.P.R. passenger agent here. Later, Mr. Courtney has been in the transportation business in Los Angeles with the American Express Company and also with the Alaska Steamship Company.

For the increased airplane service from Victoria, the landing stage at Brackman and Ke's Point is to be reconstructed and modernized, Mr. Olson said.

Hobbs Scores His First Century Of O.C. Cricket Season

London, May 1.—Jack Hobbs, peerless veteran cricketer, to-day in his first innings of the season showed his best form by scoring a century for Surrey against Glamorgan. His three figure innings was one of the several large scores. W. M. Woodfull and Don Bradman, of the Australian team, also made centuries against Worcester, the latter's total being 236.

Tea time scores in matches to-day were:

Australia vs. Worcestershire, at Worcester: Worcester 131, Australia 402 for eight wickets, declared (Woodfull 138, Bradman 236).

Surrey vs. Glamorgan, at the Kensington Oval: Glamorgan 474, Surrey 286 for six wickets (Hobbs 137).

Middlesex vs. Leicester, at Lord's: Middlesex 194, Leicester 280 (Berry 85, Robins five wickets for 81 runs).

JAPANESE QUAKE RECORDED HERE

An earthquake was recorded on the seismograph of the Geological Observatory yesterday afternoon at 4 o'clock. It was announced to-day by F. Napier Denison. The disturbance appeared to be of a very slight nature and left little evidence of direction from which to determine its source.

Tokio, May 2.—An earthquake of unusual strength and duration was felt here shortly after midnight yesterday morning. There have been no reports of casualties nor any great damage from the quake. The central meteorological observatory, in the centre of activity was probably at sea, seventy-five miles northeast of Tokio. The quake, which started at 12.58 a.m., registered on the seismograph for thirty minutes. It was perceptible to humans for five minutes. Scientists attribute the quake to activity in the "outer" Tuscara-maria belt.

HEINTZMAN

A Good Piano Is Always a Sound Investment

When you purchase a Heintzman you have made a wise investment. Your musical satisfaction is assured, and if at any time you wish to sell it, simply communicate with us—the Heintzman representatives in Victoria—and we will be glad to buy it back from you for cash. A piano of Heintzman quality and reputation is always a sound investment.

STEVEDORE LOST OVERBOARD FERRY ELAINE IN GULF

Rene Bourque Disappears While En Route to Port Alberni

Nanaimo, May 1.—While returning by the steamer Princess Elaine from Vancouver to Nanaimo en route to Port Alberni, Rene Bourque, of 797 Fifth Avenue East, Vancouver, was lost overboard at a point approximately eight miles southwest of the Point Atkinson lighthouse at 6.53 o'clock Wednesday evening.

The Elaine was stopped and search by ship's boat for half an hour failed to reveal any trace of the missing man. When it was considered certain that the man had gone down the boat was hoisted back on the davits and the steamer proceeded.

A great deal of excitement was caused among the passengers traveling across the Gulf by the Princess Elaine. With two companions, F. Blumberg and T. Sayers, whom he had left a few days previously in Vancouver, Bourque was returning to his work at Port Alberni, where he was employed loading the freighter Columbia. His companions stated that Bourque, prior to his disappearance overboard, had complained that he was not feeling well and had acted queerly.

They persuaded him to go to a state-room and lay down, which he did, emerging shortly afterwards to disappear over the ship's side.

Police investigating the case learned that Bourque had not been near his home in Vancouver since April 25 last.

SEEN SWIMMING

There were but few passengers in the after part of the boat when Bourque went overboard.

He was seen swimming some fifty yards in the wake of the ship by Mrs. W. Nelson of Port Alberni, Mrs. R. B. Rodgers of Chemainus, and J. C. Dakin of Nanaimo.

HERE IS INSTANT RELIEF FOR DEAFNESS
Head Noises, Catarrh

AURINE
ROARING and hissing sounds, discharge, pain, sensitive and tender ears, and catarrh trouble. You will be surprised how quickly Aurine will help you. You may be a chronic long-time sufferer, you may have tried many things without relief, but do not give up hope before you know what Aurine can do for you. Dr. Edward Zoller, M.D., said, "Aurine helped cases I had given up as hopeless. A truly remarkable scientific remedy."

John Meredith of Canada says, "I have suffered from ear trouble for over 35 years. At times I would be stone deaf. I have only used half of your bottle of Aurine and I find it a great relief. All the head noises have gone and I can hear people talking clear. I heard the choir in our church and the organ play for the first time in 7 years. I also heard the minister read the Scripture."

Stop paying high prices for earphones, stop buying expensive treatment and enjoy the glorious relief that more than a half-million others have found in Aurine. A few drops in each ear and relief comes instantly. Mr. R. F. Maxwell, a well-known Deputy Sheriff, says, "Just started using my second bottle and am glad to state that I can now hear my watch tick. Today was the first time this summer I heard the church bell ring." No matter how stubborn or what your trouble is, you must try Aurine. No risk, no charge, no doubt, Aurine must do the work or cost you nothing. Our Book "How to Take Care of the Ears" sent free. Address AURINE COMPANY, CHICAGO, ILL.

Artificial Fever To Cure Disease?

A new artificial "fever" producing apparatus has recently been made available to the medical profession for investigation purposes regarding the suspected ability of fevers in curing certain types of disease. The new device consists of a special short-wave oscillator, which was demonstrated at a joint meeting of the New England Physical Therapy Society and the American Physical Therapy Association in Boston last week by Charles M. Carpenter and Albert B. Page, of the General Electric Company.

The equipment, similar in principle to a short-wave radio transmitter, is featured by a tube which produces an oscillating current of a frequency between 10,000,000 and 14,000,000 cycles per second. This oscillating current is concentrated between two condenser plates, instead of being fed into an aerial, and the human body to be heated is placed between the two plates.

Heat has been used throughout the history of medicine, as a means of alleviating and curing diseases, and more recently the causes and effects of fevers have been the subject of many investigations and debates. Previously it was thought that fever temperatures were only a symptom of disease, just as pain is and that the fever heat should be eliminated to make the patient more comfortable.

FEVER ENEMY OF DISEASE
Recent investigations, however, have indicated that, at least in the case of certain diseases, the fever is actually valuable in killing the germs of the disease—many germs are unable to withstand the fever temperature

ON THE JOB FOR SEVENTY-FIVE YEARS!

Seventy-five years' service with one company is the record of "Soda Ash Johnny" Horan, ninety-two, oldest active railroad man, who has been fireman, engineer, machinist, roundhouse foreman and now boiler inspector, since joining the Milwaukee line seventy-five years ago to load fuel on wood burning locomotives. Horan, who won his nickname by introducing soda ash in cleaning boilers, was the guest at a recent banquet attended by the president of the railroad. His son, William, sixty-three, is an engineer. Mr. Horan was a visitor to Victoria last summer.

of the human body. In other words, scientists now are coming to believe that fever is one of the body's curative measures against disease.

The production of artificial fevers in the human body has been a difficult task because man's temperature-regulating mechanism is so efficient. A fever results from a rise in temper-

ture throughout the body, and local external heating is quickly dissipated without raising the average temperature of the whole body.

Various methods of producing fever temperatures have been tried in the past, such as the use of hot water baths and exposure of the body to artificially heated atmosphere. The injection of a protein results in a fever, and a high fever temperature for the treatment of malaria can be produced by the injection of malarial germs in the patient.

NEW METHOD CAN BE CONTROLLED

The injection of a protein is hazardous, however, because one is dealing with unknown factors and uncertain quantities. Messrs. Carpenter and Page point out in their paper, presented at the Boston meeting, that the use of malaria or other germs often fails because of "immunity" of the patient, and is dangerous because a living virus has been introduced. The hot water bath and similar methods are time-consuming, difficult of application and not easily controlled. The new short-wave method, on the other hand, is at all times under control.

The development of the equipment for producing the artificial fever resulted from experiments conducted by Dr. Willis R. Whitney, director of the General Electric research laboratory, and Mr. Page, in studying the effects of high-frequency induction coils on fruit flies and mice.

Shortly after these experiments it was noticed that the blood temperature of the research men working in close proximity to vacuum tube oscillators, delivering six or eight kilowatts of five to six meter waves, was slowly raised.

It was known that a number of methods of producing fever have been applied to human beings for therapeutic purposes, so it seemed worth while to study experimentally this new electric fever, because it seemed to carry with it no danger and no discomfort. In addition, when the current is off, the fever quickly subsides.

If there are infections whose temperature tolerance is less than that of the "host" of the infection, it may be possible by this new method to destroy the infection.

WAVES PASS THROUGH BODY

The apparatus shown at the Boston meeting is enclosed within a case about three feet high, three feet wide and six feet long, mounted on small wheels so as to be portable. It is like a short-wave radio transmitter, with the exception that the energy is concentrated between two condenser plates instead of being impressed on an aerial. The heater consists of a vacuum tube oscillator and a full-wave rectifier that supplies the high voltage for the oscillator.

The condenser plates are of aluminum, twenty-eight inches by eighteen inches by one-eighth inch, and are covered with hard-rubber plates thirty inches by twenty inches by one-quarter inch to prevent arcing should the patient or attendant come in contact with the plates. In this field of undamped waves between the plates there is a rapid alternation of 3,000 volts.

The patient is suspended on interlaced cotton tapes stretched across a wooden frame twenty-six inches by twenty-eight inches, made of two-by-six lumber. The under surface of this frame is covered with composition boards, forming an air chamber beneath the body.

A cover of the same material, eight inches high and one foot shorter than the frame, is fitted over the frame so that the head of the patient projects through an opening at one end. Thus, there is formed a fairly

New Gillette Blades
a day!

NEW GILLETTE BLADE
PATENTS PENDING

Dominion-wide demand forces Gillette production to highest point in history

"Send more blades! Send more blades! Send more blades!"

The telegrams keep pouring in; and our plant attempts to answer them by making 266,000 of the New Gillette Blades a day! The highest production in our history!

Yet every one of those thousands of blades is carefully inspected. Every blade must be right.

If your dealer is temporarily short of the New Gillette Blades, he will have them presently.

If he has not been able to get a sufficient supply of the New Gillette Razors, remember that the new blades can be used in your old Gillette until you get your new one.

We promise to catch up to the demand very soon. Then everybody can have the perfect combination of the New Gillette Blade in the New Gillette Razor.

The greatest \$2.00 worth of shaving comfort ever offered.

TARIFF CUTS ARE BEING ANNOUNCED BY DUNNING IN BUDGET SPEECH

Federal Minister of Finance Outlines the 1930-31 Revenue Plans

(Continued From Page 1)

Ottawa, May 1.—An estimated surplus of \$44,507,000 for the fiscal year 1929-30, was announced by Hon. C. D. Dunning, Minister of Finance, in his budget speech in the House of Commons this afternoon.

Together with this announcement came the important statement that "numerous and complex" changes in tariff rates were provided for. Summarized briefly, the Minister told the House the present budget tariff proposals involved, under the general tariff, increases in rates on fifty-four items and decreases on forty-six; under the intermediate tariff, increases in rates on thirty-five items and decreases on ninety-eight; and under the British preferential tariff, increases in rates on eleven items and decreases on 370. When the revision was completed, he said, the Canadian customs tariff would consist of 1,185 items, of which 589 would be free under the British preference. The changes proposed, the Minister stated, would have the effect of greatly increasing the British preference in the Canadian market.

"Canada will not engage in a tariff war with any country," asserted Mr. Dunning. "The world shows at the present time too many examples of disaster following such a course. As a great exporting nation our course must be the contrary—one of facilitating trade with those who facilitate trade with us. Those who make prohibitive barriers against our products entering their markets must expect we will extend favor to our own good customers raising to them. I speak in no spirit of retaliation. I would much rather extend lower tariff favors to those who extend them to us than to impose prohibitive tariffs in return for like treatment."

INTEREST GREAT
An expectant and interested House of Commons followed the Minister in the first Federal budget statement made by him.

At the outset of his financial statement, Mr. Dunning gave to his predecessor in office all credit "for the favorable financial statement I have to present."

"It was the late Hon. James A. Robb, he said, who gave to the fiscal policy for the year. Mr. Robb was in command during the first seven months of the period, and the stamp of his personal policy was found throughout the balance sheet and, in particular, on the debt statement."

REPORTS STILL INCOMPLETE
The surplus announced by Mr. Dunning was arrived at by deducting the total expenditures for all purposes during the fiscal year, amounting to \$402,215,000, from the total ordinary and special revenue of \$447,322,000. His figures revealed a decrease in Canada's ordinary and special revenue during the year under review, in comparison with the fiscal year 1928-29, amounting to \$14,325,000. The Minister stated that for the fiscal year ended on March 31 last, the final revenue figures had not yet been completed. Minor changes in the figures submitted might be made later.

TOTAL EXPENDITURES
Total expenditure, as estimated by Mr. Dunning, was \$224,514,000 greater in the last fiscal year than during the preceding twelve months. His statement revealed total estimated expenditures for the fiscal year just closed of \$402,215,000. For the fiscal year 1928-29 this total was \$387,890,000.

With respect to the drop in Dominion revenues, Mr. Dunning told the House that last season a number of the so-called "nuisance" taxes had been abolished while a substantial reduction was made in the sales tax. These reductions he estimated had decreased the total revenues by \$20,825,000, while customs duties dropped a further \$7,600,000.

On the other hand income tax revenue was estimated as \$9,760,000 higher than the preceding year, post office revenues were up 2,700,000, excise duties increased by \$1,295,000, and returns from investments by approximately \$1,000,000.

PAID OUT OF REVENUES
The Minister mentioned some of the important items of expenditure. He said: "The \$23,342,000 was estimated for expenditures on capital account, all being paid out of the revenues for the year. The more important items were \$10,000,000 for the new Welland Ship Canal and \$6,500,000 for the Hudson Bay Railroad and terminals. In connection with the St. Lawrence River Ship Channel, it was estimated \$2,700,000 had been spent and, in addition, the construction of regulating and retaining dams in that river had cost \$400,000. Half a million dollars was spent in the Great Lakes, while \$1,500,000 was the estimated expenditure on account of the construction of lower lakes terminals. The other major item of unusual factors made \$1,900,000, spent in constructing new public buildings in Ottawa."

PUBLIC DEBT
The unamortized, funded debt of the Dominion Mr. Dunning placed at \$2,296,837,225. Of that amount approximately \$65,000,000 was held as a sinking fund, leaving \$2,191,746,563 in the hands of the public.

He did not anticipate the debt financing program for the present fiscal year would be a serious problem, but there remained the much larger question of refinancing the 1928 and 1929 loans, totaling \$282,000,000. Careful consideration was now being given to this. Obviously these large loans

green. Employment throughout industry in general was maintained at a high level, although irregular in some groups, particularly in those which are seasonal, dependent on crops or on a luxury buying demand.

"There is, I think, some national significance in the fact that the railways last fall were not called upon to move harvesters to the prairies. It is true that the crop was much smaller than that of the year before, but in many a year when the volume was no larger men had to be brought from the east. It would appear that the increasing population of the prairies, coupled with the many labor and time-saving machines now available to cut, thresh and haul the crops, is bringing about the solution of a problem which has long engaged the attention of Canadians—that of seasonal supplies of labor during the harvest period."

CO-OPERATIVE MARKETING

"Western farmers are also advancing along co-operative lines, designed to promote orderly marketing of crops. Too much importance cannot be attached to these efforts, Canada's grain production for export is tremendous. In marketing she must compete with the world. Co-operative effort in the agricultural sector of the economy is an important part in bringing about an increase in per capita production. It is evident from the figures just quoted that Canadian industry is more than keeping abreast of world development in that respect."

"While Nature, in no small way, influences the volume of production, the same does not apply to the output of our factories. A short time ago a distinguished former minister of finance, Sir Thomas White, in addressing the shareholders of a corporation which he is an officer, made an interesting comment that Canada now ranks seventh in world manufacture, and that the value of industrial production during 1928 was around \$4,000,000,000, an increase of about \$200,000,000 since the close of 1926. He also stated that the statistics of value added by manufacture, per worker, show that the industrial efficiency of Canada is close to the level established in the United States, which is regarded as the highest in the world and industrialists recognize that scientific research, coupled with ingenious mechanical inventions, has played an important part in bringing about this increase in per capita production."

STEADY WIDENING OF MARKETS
"During the past winter some good Canadians became anxious as to the purchasing demand within the Dominion. They were influenced by the falling off in exports due to the slow movement of field crops and a hesitancy in buying, due to the stock exchange market depression. They recognized that while only a small proportion of our population were speculators in shares, the losses of these had a psychological effect on other groups, thus creating a buyer-market in place of one limited only by the producing capacity of Canadian industry. Might I submit that the capacity of our productive units creates a demand for normal non-speculative demand for our products there would be cause for alarm, but such is not the case."

"The development of our natural resources and industries based thereon has been accompanied by a steady widening of our markets. The outlet for our manufactured goods increases as their reputation grows and finds favor both at home and abroad."

STOOD TEST IN CRISIS
"In the stock market crisis our credit agencies stood the test and were always in a position to meet the demands made upon them. These factors forecast the future strength of Canada. That Canadian business, giving the phrase the broad meaning, should be submitted to a double test simultaneously is regrettable, but the result is a greater confidence and faith in our country."

"We have marshaled our resources to meet the problems arising from delayed marketing of the grain crops and, at the same time, absorbed the results from tens of millions of dollars being suddenly withdrawn from the ordinary reservoirs of credit."

SET RECORD IN DEBT PAYMENT
"I now come to the presentation of the financial statement for the year. In doing so I claim no personal credit for the favorable statement I have the honor to present. The fiscal policy for the year was planned by a country which has passed from our midst, and whose absence I feel to-day most keenly. Mr. Robb was in command during the first seven months of the period, and the stamp of his personality is to be found throughout the balance sheet and, in particular, on the debt statement."

"With the best characteristic dread of debt he annually budgeted for debt reduction, and in the last seven years attained for Canada greater success, relatively, than has been achieved by any country which took part in the Great War from the outbreak of hostilities. Annually the debt has decreased and, the year under review, a record which may stand as a monument to his memory was made. Two loans, totaling \$16,000,000, were redeemed out of accumulated revenue surpluses."

"During the year the board of audit, on the instructions of the treasury board, made a survey of the operations of the Soldier Settlement Board. Their report was tabled in the House of Commons on February 24, and it will be recalled that one of the board's recommendations was that a further sum of \$10,000,000 of Soldier Settlement Board loans be transferred to active non-active assets. It is the opinion of the board of audit that this amount, together with the \$14,000,000 which was transferred to non-active assets in 1927-28, should provide for all loans which might reasonably be anticipated. In accordance with this recommendation the transfer was made."

"Dealing first with the revenues, may I state that while the fiscal year ended March 31, the final accounting has not been completed. Consequently, minor changes may later be made in the figures now given."

TARIFF PLANS
With respect to the tariff changes, Mr. Dunning declared they were not the result of any "50-cent war" with any other country. They were an expression of the spirit in which Canada would approach the Imperial Economic Conference in a few months' time.

"In other words," he continued, "we do not intend to meet the other countries of the British Commonwealth of Nations in a spirit of petty bargaining but rather in the broad spirit of willingness to become in a real sense a measure good customers of those who treat us in like manner. This is the spirit in which we desire to meet all nations but we believe that within the British community of nations lies the greatest measure of opportunity for mutual development or trade because our common heritage, kindred institutions and common patriotism."

GRAIN SITUATION

The text of Mr. Dunning's speech follows:
"Mr. Speaker, before touching on the Dominion's finances for the fiscal year just ended, may I survey a few of the events which have indirectly influenced the balance sheet? As we all know, national revenues are dependent on the report which the business transacted. During the year certain unusual factors made themselves felt, in particular, the delayed marketing of the grain crops and the great decline in prices of stocks in the latter months of the year. While these factors are important, they cannot be considered as permanently prejudicial to our economic structure."

SUBSTANTIAL DEVELOPMENT
"Looking back over the year, it is noted that substantial development occurred throughout Canada. Many undertakings of magnitude were completed; others made promising pro-

TAX REDUCTION CUT REVENUE

"Last season a number of what are generally known as 'nuisance' taxes were abolished, and a substantial reduction was made in the sales tax. These reductions, it is estimated, have decreased our revenues by \$20,825,000. There will also be a reduction in the net revenues from customs duties of over \$7,000,000."

"On the other hand, certain revenue sources show increase. The estimated revenues from the income tax are \$70,700,000 in excess of the amount collected a year ago. The post office revenues are estimated at \$2,700,000 above last year's; excise duties have increased by \$1,295,000, and returns from investments, \$1,000,000. In all, \$78,321,000 is the estimated revenue from taxation, while receipts from other sources are estimated at \$1,998,000, thus making the estimated ordinary revenues for the fiscal year \$80,319,000. To this should be added special receipts, amounting to \$7,016,000, making the estimated total of all revenues \$87,335,000, as compared with actual revenues of \$447,322,000 in the fiscal year 1928-29."

"With the permission of the House, I place on Hansard a comparative statement of the revenues for the fiscal year 1929-30 and the actual revenues received during the previous fiscal year."

REVENUES

	Actual 1928-29	Estimated 1929-30	Increase	Decrease
ORDINARY REVENUE				
TAXATION REVENUE				

Customs import duties	\$187,208,000	\$179,540,000	\$7,668,000

Total ordinary revenue	\$435,464,000	\$440,308,000	\$4,844,000	\$90,020,000

EXPENDITURES

"For the last fiscal year the ordinary expenditures are estimated at \$395,921,000, as compared with \$395,921,000 actually spent in the previous fiscal year," continued Mr. Dunning. "A sum of \$23,342,000 is estimated for expenditures on capital account, all being paid out of the revenues for the year. The more important items are \$10,000,000 for the new Welland Ship Canal and \$6,500,000 for the Hudson Bay Railroad and terminals. In connection with the St. Lawrence River ship channel, it is estimated \$2,700,000 had been spent and, in addition, the construction of regulating and retaining dams in that river cost \$400,000."

	Actual 1928-29	Estimated 1929-30	Increase	Decrease
Interest on Public Debt	\$124,900,000	\$121,750,000	\$3,150,000

WAR PAYMENTS HEAVY BURDEN

"It has been the practice during the past several years also to place on Hansard a statement of the estimated

NO BORROWING FOR OUTLAYS

"Before leaving this phase of our expenditures, may I be permitted to address a brief comment to those who study and compare the public accounts over periods of years? All governments make expenditures on capital account and frequently undertake loans which are carried out by the use of borrowed capital. With that practice I find no fault, but may I emphasize the fact that in the past seven fiscal years it has been possible to carry out all capital expenditure of the Dominion without borrowing. The \$132,000,000 thus spent has been provided out of the revenues collected in the usual way. In addition \$74,000,000 has been paid out of revenue in the form of non-active loans to the railways and other public utility companies without borrowing for the purpose."

"Loans and advances of the character just referred to have been made

expenditures is directly attributable to the war, while receipts from the war taxes represent about thirty per cent of the revenues. The largest item of expenditure on the interest account, which it will be noted, decreased \$2,289,500 during the year. War pensions amounting to \$99,000,000 represent almost ten per cent of the total expenditure for the year. This statement will now be tabled."

	Ordinary Revenue	P.C. Amount	Total Rev.
Special war tax revenue:			
Excise tax (sales stamps, etc.)	\$5,000,000	14.08	

Income tax	69,185,000	15.46	
Delayed business profits tax	172,000		
Miscellaneous taxes	1,474,000	.33	

Total special war tax revenue	\$132,801,000	29.91	
Customs import duties	179,540,000	40.14	
Excise duties	64,880,000	14.52	

Total revenue from taxation	\$378,321,000	84.57	
Interest on investments	12,300,000	2.97	
Post Office revenue	33,345,000	7.45

Immigration and colonization	\$2,750,000 .68
Pensions and national health	\$1,023,000 .25
National defence	\$20

When a Child is FEVERISH, CROSS, UPSET

Colic, gas, sour belching, frequent vomiting, feverishness, in babies and children, generally show food is souring in the little digestive tract.

When these symptoms appear, give Baby a teaspoonful of Phillips' Milk of Magnesia. Add it to the first bottle of food in the morning. Older children should be given a tablespoonful in a glass of water. This will comfort the child—make his stomach and bowels easy. In five minutes he is comfortable, happy. It will sweep the bowels

free of all sour, indigestible food. It opens the bowels in constipation, colds, children's ailments. Children take it readily because it is palatable, pleasant-tasting.

Learn its many uses for mother and child. Write for the interesting book, "Useful Information." Address: The Chas. H. Phillips Chemical Co., Windsor, Ont. It will be sent FREE.

In buying, be sure to get genuine Phillips' Milk of Magnesia. Doctors have prescribed it for over 50 years. (Advt.)

10,000 MINIATURE SOLDIERS TO TROOP KING'S COLORS

Reuter's Special to The Victoria Times—London, May 1.—The interesting ceremonies and processions connected with the Trooping of the Color on the Horse Guards Parade on the occasion of the King's Birthday have been reproduced with model soldiers, correct to the smallest detail, by a lieutenant of Marines, who intends to tour the country exhibiting the reproduction, which has taken two years to complete.

The creator of the exhibition is Lieutenant A. E. Charman, whose intention is to show the nation the trooping ceremony and the procession along the Mall, which can be seen only from Buckingham Palace. There are between 10,000 and 11,000 model soldiers and civilians, which are used in eight tableaux.

The scenery of the Mall, the Horse Guards Parade, and other places through which the procession passes have been painted by artists, and music

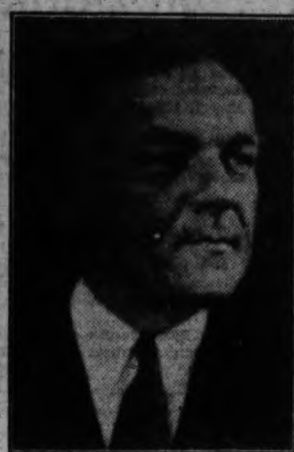

has been specially recorded on gramophone records by the band of the Welsh Guards. At the opening of the exhibition the Welsh Guards will play throughout the afternoon and evening.

A TOUR OF BRITAIN
"Commanders of various regiments," said Lieutenant Charman, "have co-operated with me in sending detailed layouts of the position their respective sections take up, together with all facts about the uniforms worn. The Duke of Gloucester drew for me in colored chalks one of his badges. The Queen, the Prince of Wales, the Duke of York, General Sir Ian Hamilton and Field-Marshal Sir Edmund Allenby are among those who have interested themselves in the exhibition. I expect that a tour of the British Isles will take at least five years. The tour opens at Sheffield, where the Lord Mayor of that city will open the exhibition."

TO HEAD LIFE UNDERWRITERS' INTERNATIONAL CONVENTION

E. V. CHOWN

ROGER B. HULL

Eric V. Chown, Toronto field supervisor of the Life Underwriters' Association of Canada, and Roger B. Hull, New York, managing director and general counsel of the National Association of Life Underwriters, appointed joint managers of the Fourth International Convention of Life Underwriters, to be held at the Royal York Hotel, Toronto, September 24, 25 and 26, 1930.

NEW WELL BLOWS IN TURNER VALLEY; IS LARGEST YET

Canadian Press

Calgary, May 1.—With announcement by officials of the Calmont Company yesterday that all efforts to measure the gas flow from Calmont No. 2 had failed owing to the tremendous force of the flow and reports from the field that the well is still showering rocks for a distance from the derrick, the well is considered probably the greatest producer in the Turner Valley field, not even excepting Home No. 3.

"We are, of course, as anxious as the public to obtain definite information upon the extent of the flow," F. C. Birks, director of the company, stated today.

"At the present time it is impossible to issue any statement in this regard."

Mr. Birks said that it was clearly seen that two separators at the location were inadequate to cope with the flow of gas, and two more separators would have to be utilized.

"Rocks are still being blown out, and when the well is thoroughly cleaned out we will connect up four separators," he said.

Despite the fact that three flare pipes have been run out from the well, each of six-inch diameter, the pressure has been increasing since Tuesday afternoon. The pressure gauge on the six-inch pipes showed forty-five pounds in the morning and eighty pounds in the afternoon. This morning the pressure had again increased.

Mr. Birks said this same day would necessarily elapse before any announcement could be made on production.

DE LUXE EDITION OF PRINCE'S BOOK TO BE ISSUED

Subscribers Will Receive
Letter of Thanks Direct
From St. James's Palace

London, May 1.—One of the first matters to claim the interest of the Prince of Wales, back from his visit to Africa, is the progress of his book, published in Canada under the title, "Legion."

This unique book, written and illustrated, at the Prince's personal invitation, by no fewer than fifty of the most famous novelists, poets and artists in this country, was published in aid of the British Legion, and the King expressly desired that the money resulting from its sale should be regarded as a thankoffering for his recovery.

It is not generally known, however, that there is an edition de luxe of the book, of which only 500 copies are for sale. This rare edition, priced five guineas, postage two shillings, printed at the Curwen Press (which has a well-deserved reputation among all bibliophiles in the English-speaking world) is a finely-printed book in the fullest sense.

The paper is especially pleasing and the type used is presented to the reading public for the first time. The title page is adorned with a copper engraving designed and engraved by Clifford Webb. Furthermore, this edition de luxe contains initial letters in red, newly designed, and the binding is handsome and durable, full buckram boards, hoxed.

The illustrations, produced by the superb colotype process, include the King (in color), the Queen, Prince of Wales, and a drawing in color by Max Beerbaum.

Admiral Sir Lionel Halsey, Comptroller and Treasurer to His Royal Highness, has made special arrangements for this limited edition to be obtained direct from St. James's Palace. Everyone who writes to him there will receive, with the copy applied for, his acknowledgment on the Prince's behalf.

This edition is extremely attractive to collectors and most probably its possessors in the years to come will find their possession has increased in value. It comprises some of the finest things ever penned, and specially penned by Rudyard Kipling, John Galsworthy, G. K. Chesterton, Hilaire Belloc, Arnold Bennett, Aldous Huxley, Edgar Wallace, Horace Walpole, Robert Bridges, the poet laureate, and Eliza Carman, whose loss to the world of letters is regretted by all.

Thus this edition of the Legion Book is a most covetable treasure, but its worth to the possessor is more than

doubled by the added virtue of being a means of helping a splendid cause. That cause is the welfare of the men who fought and faced death, and who, having survived the fight, are now finding it an even greater test of courage to face life; and it is, too, the succoring of the widows and children of those who have died after serving their country.

The proceeds from the sale of the book go to the Prince's personal fund for the British Legion—a fund with the administration of which he is personally associated.

All letters in regard to the edition de luxe of "The Legion Book" should be addressed to Admiral Sir Lionel Halsey, G.C.M.G., St. James's Palace, S.W.1. and the envelopes marked "L." Cheques should be made payable to the Legion Book Fund.

SIMPLE GLYCERIN MIX STOPS CONSTIPATION

The simple mixture of glycerin, buckthorn bark, saline, etc. (Adierika) acts on BOTH upper and lower bowel, relieving constipation in 2 hours. Brings out poisons you never thought were in your system. Don't waste time with pills or remedies that clean only PART of the bowels, but let Adierika give your stomach and bowels a REAL cleaning and see how good you feel! Adierika stops GAS bloating in ten minutes! At leading druggists. (Advt.)

"GUTTA PERCHA" GUM CUSHIONED TIRES

You drive farther before they wear smooth

"GP" Gum Cushioned Tires will give you 47½% more resistance to wear... The new tough "Resisto" tread is built to meet the strain of high speeds and the grinding effect of quick braking... The famous Gum Cushion feature completes a tire protection you cannot buy in any other standard tire sold at a similar price... See this tire now at any Gum Cushion Tire Station.

TO-DAY'S GRAIN MARKETS

(By Branson, Brown & Co. Limited)

Winnipeg, May 1.—Wheat: The market was largely a profit affair to-day, and prices were mostly higher than the previous close. Opening prices were firm and the market advanced 1/2 to 1 cent above last night's close, but the market did not act to suit the buyers of yesterday and early this morning, and they threw their holdings overboard around mid-afternoon, aided by weakness in Chicago, prices broke 1/2 to 2 cents from the early high mark.

The May support was firm and some shippers who had overvalued the market were buying. On the bulge offerings were fairly liberal, but apparently dried up on the break, and the market was able to react from the low. Mills bought a little wheat and a slight improvement in the flour trade was reported.

Seaboard houses were doing nothing, but there was a moderate export business worked overnight. In the cash market there was a fair demand, especially for No. 2 northern, and sales were made at 1/4 to 1/2 cent below yesterday's closing spreads.

Some ends of the trade are looking for a better export business to develop shortly, and are endeavoring to support the market, believing that a steady firm market will bring in the business. The weather map for western Canada was again wet over the three prairie provinces from light showers to heavy rain having been received.

Further shipments were also received in the southwest, but the weather was clear and warmer this morning. Local deliveries of wheat on contract to-day were 3,122,000 bushels.

Favor sales on all upturns from here.

Coarse grains—There was some further business in oats and barley to eastern Canada, which gave these markets a better tone, especially in the cash months.

There was no export business or inquiry from abroad. However, there was no particular feature to these markets, offerings light.

Flax—There is no feature to this market with trade passing very small. Note—Liverpool due unchanged to 1/2 lower on Winnipeg.

Dorothy Dix's Letter Box

Should a Wife Be Willing to Make Sacrifices to Help Educate Her Husband's Brother? — Are Parents Affectionate Who Only Say It With Clothes?

DEAR MISS DIX—We have been married four months and I have a very wonderful husband, but the only thing that spoils everything is the fact that we have to take care of his sixteen-year-old brother. Do you think a boy of that age should be entirely dependent on us when we are only getting a start? This boy goes to high school, but will not study, has no ambition and falls in everything, although he knows we are sacrificing to help him. He is never willing to do anything around the house, but expects me to wait on him. I work outside of the home and then come home and cook and clean the house, am doing everything I can to help my husband, but it is very discouraging. My husband and I quarrel constantly over this boy. He says I am selfish. I think he is unjust. Am I wrong?

Answer: A boy of sixteen is certainly old enough to earn part of his living, not all of it, and inasmuch as this lad will not study, the thing to do is to take him out of school and put him to work. As it is he is acquiring lazy, loafing habits that will stick to him through life if they are not curbed at once. Also he is having his morale broken down by being dependent upon others, and especially by being partially supported by a woman.

Of course it is a great pity, and it will be a serious handicap to the boy not to finish high school, but, as the old proverb has it, you can lead a horse to water but you cannot make him drink. So you can give a boy the opportunities for an education, but you cannot make him take them, and when one refuses to make his grades it is no kindness to him to keep him idling in the schoolroom. Far better to take him out and put him in a job where he will have to work hard.

Sometimes that wakes a boy up to a knowledge of how foolish he has been and how he is hampered at every step by his lack of education, and he voluntarily goes back to school and makes good. Very often a boy seems simply incapable of studying, and then the wise thing is to get him into some useful trade as soon as possible while he is still young enough to acquire skill at it.

One of our leading alienists believes that children who are under parental should be given only the most elementary education, just a little reading, writing and arithmetic, and then put to work at some useful occupation at as early an age as possible in order that they may become self-supporting.

But whether a child is a morose who cannot learn, or an idler who will not study, there can be no doubt of the necessity of teaching him to stand on his own feet and depend upon himself. Not only his character, but his success in the world depends upon his being independent and self-sustaining instead of a parasite, and so your husband does his brother an even greater injustice than he does you in not making him earn his quota of the family income and do his part of the work.

If he thoroughly understood that being permitted to stay in school was a privilege he could only enjoy if he brought in good marks, he would study. If he had to earn the money to buy his own clothes he would take better care of them. If he had to help with the housework he would appreciate how kind you were in giving him a home. The boys who have to pick up after themselves don't scatter things around, as do those who have women to clean up after them.

That you and your husband should quarrel over his attitude toward his brother is unfortunate, but natural. Millions of other husbands and wives have their daily spat over the claims of their respective in-laws upon them, and it is a subject of controversy that can never be settled because neither husband or wife can get the other's viewpoint upon it.

When a man or woman has the family complex badly he or she will ruthlessly sacrifice the other, and even their own children, to it. Inexplicably their love for their father or mother or sisters and brothers seems greater than their love for their mates, or their own flesh and blood. So does their sense of duty and obligation.

Your husband is willing to take from you to give to his brother. He is willing for you to work to support a husky lad who is ten times as able to work as you are. And there are many like him. I am thinking now of a man I knew who was really devoted to his wife and children, yet as long as he lived he took the money for which his wife had slaved and pinched and economized and gave it to his brother. He lived poorly that his brother might splurge in a city. He denied his own children the luxuries and advantages that his money afforded his brother's children.

And I know a woman who literally sold her husband into slavery to her family on the day they were married. He was a fine business man and made plenty of money, but every cent above a meagre living for themselves went to pay for a home for her mother and father, to send her brother and sisters to college, to give them trips, to pay for operations, and so on. Yet this woman was fond of her husband, and a good wife to him except in this one respect.

Of course, this is most unfair and unjust. When a man and woman marry their first duty is to each other. No husband has a right to sacrifice his wife to his family. No wife has a right to sacrifice her husband to her family, but if they have the family complex they will do it, and the only thing the poor victim can do, is to rebel and refuse to be the family goat.

DOROTHY DIX.

DEAR MISS DIX—I am sixteen years old, in high school, and have been voted the prettiest girl on the campus. As I pass I hear the boys rave over my figure. The girls envy me and compare their looks with mine and say of someone she is "as pretty as Billy," or that she "has dreamy eyes like Billy."

I hate my home as my parents are very strict and are not affectionate to me. They only show their love in the way of money and good clothes, so I am thinking of getting married, but the trouble is the man I am in love with belongs to a family in which the men all seem to forget their wives. His father and his uncles are separated from their wives. Should I marry this boy and go to a distant city and be happy with him, or stay in a home that I detest?

Answer: Well, Billy, if I were only sixteen, and had dreamy eyes and a figure boys raved over, I wouldn't think of such a thing as marrying the first man who came along. Particularly when I had parents who expressed their affection with money and good clothes, which seems to me a mighty satisfactory way to say it.

You remember that the heroine in "Gentlemen Prefer Blondes" said "a kiss is a kiss, but an emerald bracelet is something you've got," and believe me a nice fat cheque, or a new frock is a love token that is not to be despised.

Now, of course, if you were homely and unattractive; if you had pale, squinty eyes and a lumpy figure, it might be a good thing for you to grab your first proposal because that might be your last. It might be your only call to the dining car, for no other man might pop the question to you. And, anyway, if you were ugly and unattractive you wouldn't have many dates and life would be pretty slow for you, so you probably wouldn't be any duller married than you would be single.

But just think what a girl who has dreamy eyes and a figure men rave over, cuts herself out of if she gets married at sixteen. Think of all the shenanigans that she will miss! Think of the thrills that she will never have! Think of the parties she won't go to! Think of the joyrides and good times that she will pass up! For she will be as an old married woman, settled down doing her cooking instead of running around with the boys and girls, walking the baby at nights instead of stepping out. Getting fat and dowdy and old before her time.

So don't you think you would be an awful gump to get married at sixteen, when you have dreamy eyes and a figure men rave about and a papa willing and able to buy you good clothes?

DOROTHY DIX.

DEAR MISS DIX—When the husband makes life so disagreeable for the wife that she has to leave him and there are children, why is it the woman has generally to keep the children? There are as much the father's responsibility as the mother's, and since she is granted the divorce, why doesn't the court compel the father to pay at least three-fourths of their rearing if the mother has the care of keeping them.

WONDERING WOMAN.

Answer: The children are generally given to the mother because she can take care of them better than the father can. A man who has to be at his business all day cannot properly look after children. Also, as a general thing, the mother wants the children. In most States the father is made to support the children if he can't enough to do so.
